**ENCYCLOPÆDIA OF
GOLD AND SILVER COINS OF THE WORLD,**
By A. M. SMITH.

INTRODUCTORY.

Many years since, upon first applying myself to the study of Numismatics, I diligently sought for a work which should contain, in brief form, the requisite information necessary for the casual inquirer or business dealer in current and uncurrent coins of the world. Such a book did not exist. Constant demands from Banks, Bankers, Brokers, and Merchants for a work of this character, since I became a publisher, and the ever repeated regrets of experts and students in the science, that they could obtain nothing of the kind, with frequent requests from all, that I would prepare, write, or compile, such a text-book, finally induced me to undertake the onerous labor, the results of which are presented in THE ENCYCLOPÆDIA OF GOLD AND SILVER COINS OF THE WORLD.

Of works upon Numismatics, and of "Coin Books," within the last two hundred years, there has been issued an immense number, many of them very valuable in specialities; but none universal in application, all crowded with unnecessary matter, and not one adapted to the requirement of every-day business life or students' reference. To translate many of these works from the Latin, Greek, French, German, Italian, and other languages; to compare, sift, select, and verify all the mass, and to condense the information to the utmost, comprises but a portion of my task. Correspondence was entered into with the Financial Ministers of every nation on the earth possessing a coinage; official reports only were received as authority; every channel, every source of knowledge was exhausted to obtain authentic, reliable data. Our own and foreign

38577

mints, national and private; museums, collections, and cabinets have given copies of their treasures to our artist's pencil. Foreign and Home departments, financial institutions and financiers, the most distinguished scientists, have all generously responded to every application for information and material. The results of long years of study and dearly bought experience; large sums of money for importations of literature, purchase of rare, costly volumes, specimen coins, artistic and clerical labor, have all been lavished upon this work to render it complete and correct, an authority beyond question, an embracement of the entire field.

In the interests of the science to which I have been so long devoted, to justify the flattering opinion expressed by those who desired this work from my hands, to aid, so far as in my power, in systemizing money and commercial transactions, and for my own reputation, I have expended upon THE ENCYCLOPEDIA an amount of hard, conscientious labor for which money cannot recompense me.

With facts and figures alone I have dealt, and to present these in the plainest possible form, arranged for the most speedy and satisfactory reference, has been my sole object.

Without egotism I may say that I consider my work well done; in the whole range of literature devoted to numismatics or coined money there is and has never been, a volume so exhaustive in explanation and illustration or so certainly reliable as this Encyclopædia. Errors there may be; mistakes will creep into the most carefully edited works. I have discovered them in every authority, official document or statement I have used; consequently I cannot, do not, claim infallibility, and will thankfully receive corrections. Just, fair criticism is invited, and will be heartily welcomed. I believe my book to be the best and most complete, the only *complete* work of its kind, ever issued, and, claiming that high standard, I offer it to my friends and the public without further apology or commendation.

Philadelphia, March, 1886.

A. M. SMITH.

INDEX.—PLATES AND TABLES.

Afghanistan , Gold,	415	East Indies (Great Britain), Gold,	269
Silver,	417, 419	Silver,	268 to 273

CURRENT GOLD AND SILVER COINS OF THE WORLD.

A COMPILATION FROM OFFICIAL DATA.

Name, Fineness and Weight, of Coins furnished especially for this work by the HON. Director U. S. Mint. Amount of Pure Metal in Each Piece, accurately computed. Current Valuation of the Coins based upon the official proclamation of the Secretary U. S. Treasury, that "the values of such coins, expressed in the money of account of the United States, are to be taken in estimating the values of all foreign merchandize, made out any of said Currencies."

THE UNITED STATES OF NORTH AMERICA. [NOTE, while in the following description there may be much that at first glance will seem to be unnecessary, being perfectly familiar to citizens of the United States, yet as this book is *for the world*, it is proper that the country in which it is published, should receive equal attention with that bestowed upon foreign nations, the inhabitants of which are not, in all cases, well acquainted with our land, its commerce and finance]. The United States of North America constitute a Federal Republic comprising the central part of the continent and the territory of Alaska, separated from the rest by British Columbia (see special article on Alaska). The main portion lies between lat. 24° 30' and 49° 24' N. (at the Lake of the Woods, W. of which the boundary follows the 49th parallel), and long. 66° 50' and 124° 45' W. It is bounded N. by British America, from which it is in part separated by Lakes Superior, Huron, St. Clair, Erie, and Ontario, with their connecting streams, and the river St. Lawrence; E. by New Brunswick and the Atlantic Ocean; S. by the Gulf and Republic of Mexico, from which it is partly separated by the Rio Grande; and W. by the Pacific Ocean. The granted

UNITED STATES, N. A. Gold. I.

2

length, from Cape Cod on the Atlantic to the Pacific near the 43 parallel, is nearly 2,800 miles and the greatest breadth, from the N. W. extremity of Minnesota to the southernmost point of Texas 1,600 miles. The area, from the census report of 1880, 3,607,530 sq. miles (including Alaska but exclusive of the Lakes and River surfaces bounding the Republic or single States). There are 38 States, 1 Federal District and 10 Territories. The total area of the States and Territories, including water surface of the Lakes and Rivers, is equal to about 4,000,000 sq. miles. In 1790 the population of the U. S. was 3,929,214; there were 6 cities containing an aggregate of 131,473 inhabitants. The census of 1880 shows: population of the Republic 50,155,783; Number of cities 286; population of these cities 11,318,547. The official valuation of property in 1880, real and personal, of the people of the U. S., was \$43,642,000,000. The Independence of the United States was acknowledged by England which had held them as colonies, on September 13th, 1783, after a war which commenced in 1770, thirteen States were in the original confederation and these are given first in the table following.

STATES	Area Sq. Miles	Value of Manufactured Products in 1880	FARMS IN THE U. S. (1880)		Expenditure Pub. Schools (1883)	Population (1880)

UNITED STATES, Unauthorized Coins. Gold. I.

[The inhabitants of Alaska and the Indian Territory (both unorganized), are not included in the above total under "population." In 1880, the Alaska census showed 30,178 inhabitants; the estimated population of the Indian Territory was 75,000. In 1880, the total "colored" population of the United States, including Negroes, Chinese, Japanese and Indians, was 6,530,793. Foreign born whites, over 21 years of age, 3,072,487.]

In the year 1884 there was exported from the United States; of merchandise: \$740,513,609 in value; of specie \$67,133,383; of agricultural products, \$536,315,318. Immigrants arriving in the U. S., in 1884, 518,592; total immigration from 1820 to 1885, 12,719,095. The report of the principal cereal productions in 1880, shows a total of 1,754,861,535 bushels of Indian corn; 459,479,505 of wheat; 407,858,990 of oats; 44,113,495 of barley; 19,831,595 of rye; and 11,817,327 of buckwheat. Total cotton production for 1880, was 5,737,257 bales, averaging 475 pounds to the bale. Salt produced, in 1880, was in value \$4,817,636. The sugar product of the State of Louisiana alone, in 1883, was 221,515 hogsheads, the average weight of each being 1,137 pounds. The total tobacco crop of the United States, in 1879, was 469,816,203 pounds, valued at \$36,624,357. Pig iron manufactured in 1883, amounted in tons to 5,146,972. In 1884, there was in operation, a total of 110,414 miles of railroad, built and equipped at a cost of \$6,684,756,045, the gross earnings of which, in 1883, amounted to \$823,772,924. The telegraph companies of the United States, in 1884, had an aggregate exceeding 164 miles of line, one company alone controlling 145,037 miles of line, with 450,571 miles of wire, sending in that year 42,076,226 messages, and receiving \$19,632,940. The coal fields of the United States are estimated to embrace an area of over 600,000 square miles. There were within the Union, in 1884, 12,671 different periodicals in course of publication, daily, weekly or monthly. The public lands of the United States still open for settlement, and sold at government rates, in 1884, comprised an area of 2,835,883 square miles, or 1,814,965,179 acres. In 1883, there were 22,383 patents issued from the United States Patent Office. The public debt, in 1884, amounted to \$1,830,528,923.57, a reduction of \$942,707,250.12 from 1866, at the conclusion of the civil war. There are 59,017 post offices; 43,838, - 127 miles of post-routes, and the service is administered at a cost of \$46,404,960 per annum. The total tonnage in 1884, including vessels of every class, was 4,271,229 tons. The total receipts of the U. S. for the year ending June 30, 1884, were \$348,519,860. The gold and silver produce from the mines of the United States in 1883, in value was of gold \$30,000,000; of silver \$46,200,000. The amount of National Bank and Legal-Tender Notes, outstanding on October 31st, 1884 was, of National Bank Notes \$332,473,693; of Legal-Tender Notes \$346,681,016. The United States paid in 1884, in pensions to the 322,756 surviving participants in her wars, or to their legal heirs, the sum of \$56,963,098. The amount of appropriation made by Congress, for the fiscal year 1885, to carry on the different departments of the government, was \$137, - 451,398. To enumerate the cultivated and natural products of the United States would require more space than a volume of this class can afford. There is no gift bestowed by nature, necessary for the comfort or luxury of mankind that does not exist or have its equivalent within the boundaries of the nation; the wealth of minerals,

UNITED STATES, N. A

Silver. I.

23

precious and useful, is incalculable and inexhaustable, and its resources are so varied and immense as to render it, if needs be, totally independent of its entire world beyond its limits. The state of the total United States circulation, on October 1st, 1884, was as follows:

	In Treasury	In Banks and Gen'l Circulation	Total
Gold Bullion	\$ 52,940,587		\$ 52,940,587
Silver Bullion	4,931,404		4,931,404
Gold Coin	161,957,455	\$ 392,630,988	557,588,441
Silver Dollars	142,058,787	40,322,042	182,380,829

Alaska, a territory of the United States, formerly known as Russian America. It comprises that part of the continent W. of the 141st meridian of W. long., with a narrow strip of land between the Pacific and the British dominions, with the Aleutian archipelago; area 577,390 square miles, and population in 1880, of 30,178 (about 16,000 civilized), composed of Americans, Esquimaux and kindred tribes and Indians. The principal settlements are Sitka, or New Archangle, the capital, St. Paul, on Kadiak Island. The main depot of the seal fisheries, and Captain's Harbor, on the island of Unalaska. The coast line, 4,000 miles long, is bordered N. by the Arctic Ocean, W. by Behring Sea, and S. by the North Pacific Ocean. Cape Prince of Wales, a rocky promontory on the E. side of Behring strait, is the most westerly land on the American continent, being only 45 miles from Asia. On the Pacific coast are dense forests of the Sitka spruce or white pine, and the yellow cedar, hemlock, and balsam fir are also found. Certain districts offer good grounds for agriculture and pasturage. Coal exists in several sections. Gold, silver, cinnabar and iron are met with in limited quantities. Four species of bears are found, with the fox, marten, otter, mink, lynx and wolverene. On the coast are the fur seal, sea lion, sea otter and walrus; in the adjacent seas whales abound; and cod, herring and halibut exist in immense numbers. Vast quantities of salmon and other river fish are caught and dried; in summer Alaska is the resting place of myriads of migratory birds. The fisheries and fur trade are the leading industries of the country. The taking of fur seals is now regulated by law. In 1880, the value of the fisheries was \$3,601,040. The U. S. government has appropriated \$25,000 for educational purposes, without distinction of race. The Territory of Alaska was purchased from Russia, by the United States, in 1867, for \$7,200,000.

EQUALIZATION TABLE

GIVING THE AMOUNT OF GOLD OR SILVER IN COIN.

Explanation:—To find the actual amount of pure metal contained in a coin, its fineness being known, take the gross weight of the piece on the "grains" table and follow directly across until the column of the given fineness is reached. Thus, 110 grains gross, at 875 fine is found to be 96½ grains pure. If the coin weighs 100 gross take the 100 and the 9 figures in the grains table. The calculations are only made as far as 800 fine. If lower or intermediate grades of fineness are sought, the simple rules of arithmetic will give the results of any possible combination, 450 fine being one-half of the figures here given for 900, &c., &c. Of course 1000 fine means the entire gross weight is pure.

GROSS WEIGHT. GRAINS AT 1000 FINE.	FINENESS 975 GRAINS	FINENESS 950 GRAINS	FINENESS 925 GRAINS	FINENESS 900 GRAINS	FINENESS 875 GRAINS	FINENESS 850 GRAINS	FINENESS 825 GRAINS	FINENESS 800 GRAINS

TABLES

Giving the Cash Value of Gold and Silver 1000 Fine by Grains and Pennyweights.

The value of any lesser fineness may be determined by deducting at the rate of 10 per cent. for each hundred. Thus 925 (English Standard) is $7\frac{1}{2}$ per cent. less than this table. For 900 fine (American Standard) deduct 10 per cent.; for 850, take off 15 per cent. and so on to any limit.

GOLD. Opposite the number of grains on the outer columns, stands its money value calculated at U. S. Standard, 1000 fine, \$20.00 per ounce.

SILVER. The money value occupies the outside columns in this table. As the price of Silver fluctuates more and more each year, these calculations have been based upon the metal at \$1.00 per ounce, 1000 fine; such price being a fair and safe average for buyer and seller.

ARG. REPUBLIC. (LA PLATA) S. A. Silver. II.

ARGENTINE REPUBLIC, South America. Bounded, N. by Bolivia and Paraguay, E. by Paraguay, Brazil, Uruguay and the Atlantic, S. by the Atlantic Ocean and Patagonia, and W. by the Andes, separating it from Chili. The Confederation consists of 14 Provinces of the Rio de la Plata, Buenos Ayres being the most populous. Total area, 1,619,500 square miles; population, 2,942,000. Exports mostly wool, hides and tallow, amounting in 1882 to \$60,389,052. No banking law exists; the National and Provincial are the only authorized banks of emission; private banks are not required to present their cash statements. Agricultural products, wheat and maize, cotton, rice, sugar, indigo, tobacco, flax, cocoa, cochineal, madder, cinchona, Paraguay tea and fruits. Minerals, gold, silver, copper, coal, salt, alum and sulphur.

BOLIVIA, a Republic and most central State of South America. Area, 586,200 square miles; population, 2,325,000. Immensely rich in Silver, the mines of Potosi having yielded, since 1545 over \$1,600,000,000; gold, copper, lead, tin, salt and sulphur are also found, with large guano deposits. The agricultural products are rice, barley, oats, maize, cotton, cocon, indigo, potatoes, the choicest fruits, India rubber, gum, cinchona bark and medicinal herbs. Exports in 1881, \$9,381,973. Only one chartered bank exists. Most of the imports are through German houses. Its exports comprise all the native productions.

BRAZIL, the only Kingdom on the Western Continent, and the largest country of South America; bounded N. by the Atlantic Ocean, Guiana, and Venezuela; W. by Ecuador, Peru, Bolivia, Paraguay and Argentina, S. by Uruguay, and E. by the Atlantic Ocean. Area, 3,287,984 square miles; population, 11,831,326. Brazil consists of sixteen provinces along the coast, and four in the interior. It has noble rivers; the forests abound in mahogany, logwood, rosewood, brazil and other valuable woods. Maize, beans, cassava-root and nuts are generally cultivated, also cotton, sugar-cane, coffee, india-rubber, and tobacco. The minerals comprise gold, silver, iron, diamonds, topazes and other precious stones. Its exports consist of all the products and amounted, in 1883 to \$108,354,000. All the gold produced at the mines is exported except a comparatively small amount coined at the national mint. No gold is in circulation and very little silver, the paper money consisting of Treasury bills and notes of the Brazil and other banks. There are 23 lines of steam-vessels, receiving annual subsidy from the State of \$1,000,000, besides the North American steamship line running from New York to Brazil receives \$100,000 annually. In 1884 there were 3,500 miles of railway open and 1,500 in course of construction.

CHILI, a Republic of South America, between the Andes range of mountains and the Pacific Ocean, including Patagonia west of the Andes, extending coastwise from Bolivia to Cape Horn. Agriculture flourishes; the wheat crop averages 10,000,000 bushels, two-thirds of which is exported. There are mines of gold, silver, copper, coal, lead mixed with silver, and iron; in its mountains are found the agate, jasper, rock crystal and other precious stones. The manufactures are earthen and copper wares, cordage, linens, soap, brandy and light wines. Chief exports: wheat, flour, hides, tallow, salt, wool and the metals--they amounted in 1882, to \$71,374,120. There is a National mint, but as the gold coined is almost immediately exported but little of it is seen in circulation; there is a paper money of National and other bank notes amounting to over \$40,000,000.

THE UNITED STATES OF COLUMBIA, a Republic of South

America, including a large portion of what was once New Granada, consisting of nine States:—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima. Area, 320,733 square miles; population, 8,000,000. Its extensive forests contain mahogany, cedar, fustic and other dye-woods and medicinal plants. The mineral productions are gold, silver, platinum, copper, iron, lead, coal and precious stones. It grows tobacco, coffee, cocoa, plantine, bananas, vegetable ivory and indigo; also wheat and other cereals. The cattle of its plains yield large quantities of hides and "jerked" beef. Chief exports: cinchona, tobacco, coffee, hides, caoutchouc, straw hats, dye-woods and the precious metals, amounting in 1883, to \$5,625,000. Nearly all the gold in the country is exported; none has been in circulation for years past. In 1883, there was exported, in gold and silver coin and bars, \$2,400,083. In December of that year the circulation of bank bills was \$1,097,830, and silver coin of 50 cents each, at a discount of 25 to 28 per cent. below American gold.

VENEZUELA, a Republic, the most northerly of South America, formed after the dissolution of the old republic of Columbia, dates from the constitution of 1864. Area, 403,276 square miles; population (1881), 2,075,245. It consists of 20 States, besides the Federal district. The chief exports are coffee, cocoa, cotton, sugar, tobacco, indigo, bark, hides, tallow, dye-woods, timber and metallic ores. Revenue (1883), \$5,801,000; expenditures, \$5,320,405; public debt, \$21,010,000 (payment of interest on which was resumed in 1875). Imports (1882), \$14,800,000; exports, \$15,300,000. There is no mint in this country, the coins are struck abroad. There are two banks in Caracas (the capital), the "Commercial Bank," and the "Bank of Caracas;" the first with a paper circulation of 1,600,000 bolivars, and the second with a like issue of 1,300,000 bolivars. United States and English gold, and Spanish American doubloons are the foreign coins here in circulation. The foreign debt of Venezuela, which had grown to over \$54,000,000 in 1875, when interest payments were resumed, was "consolidated" into 4 per cent. bonds in 1881.

PERU, an important maritime Republic of South America, on the Pacific Ocean. Area, 416,493 square miles; population 3,374,000. Its valleys are very fertile, and the mountains rich in minerals; silver, quicksilver, and copper being most plentiful. Its medicinal productions are of great value: cinchona, sarsaparilla, copaiba, etc. The Hunnillos, Guanape, Macabi Islands, Pabillon de Pica and Lobos supply Europe with guano; cotton, sugar, grapes and olives are largely raised. Silver is produced to the amount of 3 to 4 millions dollars annually. Exports from latest official report (1879), \$31,000,000, consisting of guano, nitrate of soda, sheep and alpaca wool, sugar, silver and cinchona. Wars and revolutions have destroyed its finances; the expenditure is always in advance of the revenue. In 1879 the public debt was over 241 millions, and interest on the foreign debt in default.

HAWAÛAN (*Sandwich*) Islands. A rich and beautiful chain of islands, situate in the North Pacific Ocean (consisting of 13 islands, 8 of which are inhabited), forming the kingdom of Hawaiï. United area, 7,628 square miles; population, about 52,000. They are admirably situated for trade, being in the route from America to China, and in 1883 were visited by shipping to the extent of 185,316 tons. Exports (1882), \$4,974,500, consisting of sugar, rice, coffee, puln, hides, etc.; imports, \$8,300,000. Revenue, 1,780,080; expenditures, \$2,196,000; public debt, \$301,495. In 1883, silver half-dollars were coined for this government in the United States to the amount of \$300,000; this was done under what is known as the "Spreckel's contract." Fifty per cent. of the gold in the country is of U. S. coinage. The amount of government (and only) paper currency outstanding at close of 1883, was \$335,000, and this currency is issued only on and to the extent of coin deposits kept in the treasury for its specific redemption.

LIBERIAN COINS.—No 1. Quarter dollar, 25 cents, Nos. 2 and 3, Ten cents, (all these are of silver, same standard as the coins of United States.)

LIBERIA is an independent Republic of Western Africa, composed of Colored Emigrants from the United States, and their descendants, founded in 1820 by The American Colonization Society as a settlement; organized as a Republic in 1847. It occupies that part of the coast of North Guinea between the rivers San Pedro and Tong, about 500 miles extending inwards an average of 100 miles. Population, 150,000. Exports: coffee, sugar, ginger, palm-kernels, palm-oil, indigo, ivory, gold-dust, etc. Revenue, 1884, \$190,000. Chief Town, Monrovia.

AUSTRIA, called since 1867 the Austro-Hungarian Monarchy. 246,954 square miles of area; 39,196,494 population. Exports, \$376,000,000. It possesses great mineral riches of gold, silver, copper, iron, quicksilver, lead, tin, zinc and coal. Principal exports, dried fruits, cereals, roots, animal products, textiles, leather goods, wood, glass and earthenware, hardware, machinery, tools, beer, matches and small sundries. The imperial royal principal mint is at Vienna, the capital. The Empire is divided into the Austrian State and the Hungarian State, each having its own Parliament, Ministry and Administration. The lands of the Austrian Crown are Lower and Upper Austria, Salzburg, Styria, Carinthia, Carniola, Coast-Districts, (Görz, Istria, Gradisca, and Trieste), the Tyrol and Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina and Dalmatia. The Hungarian Crown holds—Hungary, Transylvania, Fiume, Croatia, and Slavonia. As a wine producing country Austria is second only to France, the value of this product being annually in Austria \$2,000,000, and in Hungary \$55,000,000. The Gross Revenue in 1883-84 was \$384,400,170. Expenditures, \$406,872,690. Deficit (chronic) \$23,472,520. Amount of Public debt, Jan. 1884, was \$2,262,141,085. December 31st, 1883, the amount of specie in the Austro-Hungarian Bank was, in Gold, 77,682,053 Florins, (\$30,917,457); in Silver 121,696,815 Florins, (\$48,435,332). Paper circulation (Dec. 31, 1888) State notes 350,951,770 Florins, (\$139,678,804); Austro-Hungarian Bank notes 380,457,420 Florins, (\$151,422,053).

DENMARK, a constitutional Kingdom, occupying an almost insular position between the North Sea and the Baltic. It consists of I. Denmark Proper, comprising the islands Zealand, Fünen, Lolland, etc., the peninsula of Jutland, the outlying island of Bornholm in the Baltic, and Farøe Isles; II. Greenland, Iceland; and III, its colonies of St. Croix, St. Thomas, and St. John in the West Indies. The total population of all these is 2,096,400, and the entire area 15,218. Products, wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep and butter; these all comprise its chief exports, amounting in 1883 to over 55,000,000. Most of the trade is with Great Britain. Exports of gold (1883), \$6,700,000; circulation officially given March 11, 1884. Gold Coin, 3,000,000 crowns (\$804,000); Silver, 15,000,000 crowns (\$4,020,000); Bank Notes, 75,000,000 crowns (\$20,234,000).

FRANCE, a Republic; the most westerly State of Central Europe; circumference about 3,000 miles, and present area 204,082 square miles; in 1871 it lost 5,603 square miles; population (1881), 37,672,048. It is divided into 87 departments, which are subdivided into 362 "arrondissements," 2,865 "cantons," and about 36,000 "communes." The vine is cultivated to a very great extent, and finest wines and brandies are made. Agricultural products: wheat, barley, rye, maize, oats, potatoes, beet roots for the manufacture of sugar, hops, etc. Mineral resources: iron is found nearly all over the country; copper, lead, silver, antimony and coal, also exist. The oyster fisheries are very extensive. Important manufactures: metal work, watches, jewelry, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Exports in 1883 amounted to \$752,215,000, and consisted mostly of woven fabrics, yarn, thread, wines and spirits, animals, meat, etc., and objects of art. The official reports for 1883, to December 31st, show the gold and silver imports, in coin and bullion for that year, to have been 148,208,885 francs (\$28,604,314.81), and exports of the same, 235,870,889 francs (\$45,524,239.58). In the Bank of France on that date there was, gold, \$185,437,293.26; and silver, \$193,440,655.09. The Bank of France alone can issue paper currency, and it had in circulation at the time above stated, notes to the amount of \$568,727,468.

THE GERMAN EMPIRE. This large Empire of Central Europe is confederated by Constitution of 16th April, 1871, under the King of Prussia, bearing the title of German Emperor. It consists of 26 States: 1. Prussia; 2. Bavaria; 3. Saxony; 4. Wurtemberg; 5. Baden; 6. Hesse; 7. Mecklenburg-Schwerin; 8. Saxe-Weimar; 9. Mecklenburg-Strelitz; 10. Oldenburg; 11. Brunswick; 12. Saxe-Meiningen; 13. Saxe-Altenberg; 14. Saxe-Coburg and Gotha; 15. Anhalt; 16. Schwarzburg Rudolstadt; 17. Schwarz-Sondershausen; 18. Waldeck; 19. Reuss (elder line); 20. Reuss (younger' line); 21. Schaumburg Lippe; 22. Lippe; 23. Lubeck; 24. Bremen; 25. Hamburg; 26. Alsace-Lorraine. Total area, 210,161 square miles; total population, 45,234,061. In 1883 the exports amounted to \$833,874,365. The export of gold for the same year, was \$8,811,931; of silver, \$4,026,304. An exclusive gold currency was adopted by law of December 4th, 1871. Chief exports: woven fabrics, clothing, colonial ware, animals and food. In 1879, heavy additions were made to the tariff on imported goods, and Germany has returned to an extreme protective system. Details are given under headings of the different States.

Bavaria, the second kingdom in size and population of the German Empire, divided into two unequal parts, the eastern portion comprising eleven-twelfths of the whole; the western part forming the Palatinate on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle and Lower Franconia, and Swabia). Area of all, 29,293 square miles, population (1880), 5,384,778. One-third of the country is in forest. The soil is highly productive. Lower Franconia and the Palatinate produce fine wines; hops are largely grown. Minerals: salt, coal, iron, copper, pyrites and manganese. Brewing of beer here attains great perfection. Exports are timber, grain, wine, hops, beer, leather, glass, jewelry, etc. Budget (1884), \$56,615,640.

Prussia comprises the larger portion of Germany. The kingdom comprises 13 provinces: 1. East Prussia; 2. West Prussia; 3. Brandenburg; 4. Pomerania; 5. Posen; 6. Sillesia; 7. Saxony; 8. Schleswig-Holstein; 9. Hanover; 10. Westphalia; 11. Hessen Nassau; 12. Rhenish Provinces; 13. Hohenzollern; the area of all these being 135,955 square miles; and their population 27,279,111. The forests of Prussia cover nearly 10,000,000 acres, consisting chiefly of fir trees. Minerals: iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, etc., and a little silver. Salt (from brine springs) is abundant; also coal. Wheat, rye, oats, barley, peas, millet, rape seed, maize, linseed, flax, hemp, tobacco, hops, etc., are extensively cultivated and largely exported. Cattle are raised in large numbers. The western division is noted for fine fruits and vegetables, the Rhenish Provinces stand pre-eminent for their wines. Manufactures: chiefly linens. Cotton works are numerous; and also factories for silk, woollen, mixed cotton and linen fabrics, shawls, carpets, etc., leather, earthenware, glass, paper, tobacco and metals. Brewing is a business of great magnitude. Principal exports: linens, woollens, hardware, corn, wool, timber, pitch, linseed, tobacco, mineral waters, horses, cattle, hams, salt meat, and wines.

Saxony. The third kingdom in importance of the German Empire. Area, 5,789 square miles; population 2,972,805. Agricultural products: the usual cereals and leguminous plants, with rape seed, buckwheat, flax, hops and fruits. The timbers of its forests are a great source of wealth. Mines yield silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, etc., besides coal, marble, porcelain, earth and gems; such as topases, chrysolites, amethysts, corneliains, garnets, etc. Linen and cotton spinning, and weaving are most extensively carried on. Broad cloths, merinos, silks, mixed silk and woollen goods, thread, muslin-de-laines, laces and embroideries made here are in high repute. The "Dresden China" is noted throughout the world; all these form the principal exports.

ROUMANIA,

Silver. XXXVII.

ROUMANIA COINS.—Silver, all 900 Fine. No. 1, 5 Lei, 385 grains weight, 346 grs. pure,—72 cents; Nos. 2 and 6, 1 Leu, 77 grains weight, 60 grs. pure,—14 cents; Nos. 3 and 5, 50 Bani, 38 grs. weight, 34 grs. pure,—7 cents; Nos. 4 and 7, 2 Lei, 154 grs. weight, 138 grs. pure,—28 cents.

ROUMANIA. This kingdom consists of the Moldo-Wallachia provinces, formerly belonging to Turkey, by treaty of Berlin, 13th July, 1878, recognized as an independent State, and the territory of Dobrudscha added to it; raised to a kingdom March 26, 1881. Total area, 49,262 square miles; population 5,376,000. *Wallachia*, largest of the three provinces, has area of 28,276 square miles. The soil is very rich. Products: corn, maize, millet, beans and peas; vines and various fruits are abundant; forests most extensive. Immense numbers of cattle, sheep and horses are reared; minerals and precious metals are said to abound. Exports: wheat, maize, rock-salt and cattle. *Moldavia*, the least of the three provinces, has about 2,200,000 inhabitants; it produces large quantities of fruit, grain and wine. Public revenue of Roumania (1884), \$26,280,115; expenditures, about the same as the revenue; public debt, \$132,816,060; imports (1882), \$53,870,420; exports (1882), \$48,946,141. Since 1881, there has been authorized an issue of 25,000,000 lei, in pieces of 5 lei; the coinage of gold has been very small, the circulation in that metal is composed almost entirely of Napoleons and Austrian pieces of 8 and 4 florins. The paper circulation in 1883, was 12,091,730 francs in treasury notes, and 58,498,790 francs in national bank notes.

England is divided from Scotland on the north, by the Cheviot Hills and the rivers Tweed and Solway, and from Wales by the Severn and Dee. Area, about 51,000 square miles; population (1881), 1,360,513. Agriculture is prosecuted industriously and intelligently, and yields large returns. The country is rich in minerals; iron, tin, lead, copper and coal, the product of pig iron amounting to about \$80,000,000 per annum, and of coal to \$230,000,000; the metal manufacture employs about 650,000 hands, and the textile industries are of such enormous extent as to require over one million operatives. British goods are found in every portion of the globe. The Island of Great Britain contained in 1883, in active operation, 18,457 miles of railway. The telegraph extended 27,103 miles, owned and operated by the government since 1871.

Wales has an area of 4,712,281 square acres, population (1881), 1,360,513. The country is generally mountainous, but like England, it possesses great mineral wealth. The country occupies a large peninsula on the west side of the island of Britain, bordering on the Irish Sea and Bristol and St. George's Channels. The laws of England were fully extended over Wales by statute in 1536. In the reigns of George IV and William IV, the last traces of political distinction were abolished.

Scotland (*the ancient caledonia*) is situated in the most northerly part of the island. Area, about 30,000 square miles; population (1882), 3,735,573. The land is naturally barren and bleak, but the hardy persevering inhabitants have made it productive, and their country wealthy and prosperous. The union with England took place in 1707, a rebellion in 1745 was suppressed, and the Scotch people submitting, devoted themselves to the material welfare of their nation with results which have been continuously beneficial.

Ireland is an island lying about 60 miles to the west of England, washed upon three sides by the Atlantic Ocean, and on the east by the Irish Sea or St. George's Channel. Its greatest length is from north to south, 306 miles, and from east to west, from 120 to 180, with an area of about 81,759 square miles, with population, in 1881, of 5,174,836, which is continually decreasing and has been since 1845 at the rate of 37.6 per cent. This island abounds in natural beauties, the harbors

are among the finest in the world; plants elsewhere known as "hot-house" flourish here in the open air, and there is every accessory favorable to vegetation. The sources of wealth which exist in Ireland have never been developed, owing to continual political agitation, which has been since the beginning, still continues, and is likely so to do, unto the end.

India. The British Empire in India comprises an area of 1,377,540 square miles, and a population of 254,000,000. From Peshawar, the northern frontier station to Cape Comorin, is 1,900 miles, and the same distance separates Karachi, the port of Sind, from Sudiya, the frontier-post on the eastern border of Assam. Northern India or Hindustan, is at the foot of the Himalayas, stretching from sea to sea, comprising the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra and their tributaries. Southern India or the Deccan, is bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhya Mountains, north of the Narbaddah River. Three-fifths of this great empire are under the direct rule of the British government, and are divided for administrative purposes into eight provinces: Bengal, the North-western Provinces and Oudh, the Punjab, the Central Provinces, British Burma, Assam, Madras and Bombay. The remaining two-fifths are made up of a large number of Native States, whose chiefs all acknowledge the suzerainty of Her Imperial Majesty, *Kaisar-i-Hind*.

Bengal occupies the deltas of the Ganges and Brahmaputra, and is flanked on the east by mountains which separate it from the Valley of the Irrawaddy. The province is a great alluvial plain, the most populous and productive in all British India. It furnishes rice, opium, indigo and jute.

The North-west Provinces form the upper part of the great plain of the Ganges to the west of Bengal, between the Himalaya Mountains and the hilly border of the central plateau.

The Punjab occupies the north-western angle of the great northern plain of India, and receives its name from the "five rivers" which, descending from the Himalayas, cross the plain and unite in the Indus. It was annexed in 1848. Beside the territory under British administration, which is about as large as the kingdom of

Italy, there is an equal extent of area belonging to 34 Feudatory Native States, with a population of about 5,000,000; a revenue of \$8,000,000, and an armed force of 50,000 men. Thirdly, there are the frontier tribes, split up into numerous clans, with divergent interests, whose military force is estimated at 130,000 warriors.

The Central Provinces were formed from territory taken in 1861 from Madras and the north-western provinces. The line of railway connecting Bombay with Calcutta passing through it, has opened up a country previously almost unknown, and the traffic through Jubbulpur is larger than that of any city in India, except Bombay.

British Burmah is on a long narrow strip of territory on the eastern shore of the Bay of Bengal. Tenasserim and Arakan were annexed after the first Burmese War in 1825, and Pegu after the war in 1852. The valley and delta of the Irrawaddy are extremely fertile, but owing to the want of roads, the province is thinly peopled.

Assam, ceded by Burma in 1825, formed part of Bengal until 1874. The revenue is comparatively small. Cachar and Sylhet are the most important tea-producing districts in India.

Madras was the scene of the struggle between England and France, the principal settlement of the French in India—Pondicherry, being 90 miles south of Madras. This province, since the annexation of Carnatic, is larger than Great Britain and Ireland together, though with a coast-line of 1,730 miles it has not one good natural harbor.

The Island of Bombay was part of the dowry of the Infanta of Portugal, and was made over by Charles II to the East India Company in 1668. The province is 1,050 miles in length, and has many fine natural harbors; Bombay and Karachi being by far the most important. It is about equal in size to Germany, native States occupying one-third, Sind, a non-regulation province, one-fourth; and Bombay proper, once the territory of the Peishwa, the remaining 82,000 square miles. Bombay is yearly rising in importance as the great commercial port of India. It is, after London and Calcutta, the most populous city in the British Empire.

Berar, which lies to the north of Haidarabad, was placed in the hands of the English by the Nizam, in 1853, in payment of arrears due to the British Government. The province is fertile and yields the finest cotton grown in India. The surplus revenues, after defraying the cost of administration, goes to the Nizam of Haidarabad.

BURMAH, formerly independent, exclusive of British Burmah, is bounded N. and E. by the Indian Province of Assam, Thibet, the Shan States and China. Area 192,000 square miles; population 3,500,000; Revenue of the King while ruling, \$4,000,000. Acquired by Great Britain, through conquest, in November, 1885.

Native States of India.

These States vary greatly in size and importance. They cover a total area of 500,000 square miles and a population of 55 millions. Gross revenues of the chiefs amount to \$80,000,000 annually and a yearly tribute of \$3,625,000 is paid to Great Britain. *Kashmir* commands important trade routes to Central Asia. The opium grown in Malwa (*Holkar*) is a valuable source

The most important of the Native Princes are:

England	4,159,950	70,659,830
Total	\$450,626,155	\$410,092,990

The Indian Debt, on March 31, 1884, stood at \$465,956,920 in India, and \$340,544,185 in England.

To the Districts Behar and Benares, in Bengal, the growth of the poppy is strictly confined in *British India*. The juice is sent to government agencies at Ghazipur and Patna where it is dried and packed in chests of 130 lbs. each; it is then sent to Calcutta and sold at monthly auction. For the year ending March 31, 1883, 56,400 chests were sold for \$35,519,025.

Deducting \$11,411,065 for cost of cultivation and manufacture, the net profit from this Bengal "export" or "provision" opium, was \$24,108,560; besides what was exported, \$960,185 of opium was issued to the Excise Department to meet the consumption in India itself.

From Bombay, also is exported a large quantity of opium which is grown in the Native States of Central India, especially in Malwa, and the drug is thus classed: a duty of \$350 per chest is levied upon it when it enters British territory; the receipts from this source in 1882-83, amounted to \$11,978,345, which was clear gain to the government; nearly all this opium is sent to China, where it is sold by that government to the consumers for \$84,000,000.

All imports to India are now free, excepting arms and ammunition, opium, liquors and salt.

The proportion of the foreign trade which passes through the Suez Canal increases steadily, and in 1883-84 amounted to 65.68 per cent. of the whole. The total number of vessels which entered and cleared from Indian ports with cargoes in this period was 103,503, with a tonnage of 7,407,342.

British Possessions in the East. *Aden*, a peninsula on the south coast of Arabia Felix. The British own the main peninsula and the opposite one of Little Aden; also a strip recently purchased, extending about three miles inward. Total area, 70 square miles; population (1881), 35,165, including troops who man the fortifications. It is one of the English coaling stations on the Eastern highway, about 1,500 ships visiting it yearly. The exports which are all received from the neighboring countries, consist of Arabian and African coffee, African dyes, feathers, gums and hides; Red Sea Mother-o'-pearl, Zanzibar spices, Mauritius sugar and Indian tobacco. The sea exports, in 1882-83, amounted to \$7,224,450, and the land exports, to \$397,400. Aden is subject to the Government of Bombay, and a small revenue is obtained from stamps, excise, opium, salt and arms. Nothing is manufactured but salt.

Socotra, an island in the Arabian Sea, 150 miles E. N. E. of Cape Guardafui, the eastern extremity of Africa, in the direct line of communication with India. Area, about 1,310 square miles; population, about 4,000; subject to the Sultan of Keshin, who, in 1876, for a small subsidy, contracted never to cede the Socotra to any foreign power, or to allow any settlement to be made thereon without consent of the British Government. This island is famous for aloes, and the gum of the dragon's blood tree of which it produces, the finest in the world.

Ceylon, an island in the Indian Ocean, south-west of the peninsula of Hindustan. Area, 24,702 square miles; population (1881), 2,758,529. It was first settled by colonists from the valley of the Ganges, B. C. 543. Chief exports: cinnamon, coir-stuff, cinchona, coffee, cocoanut oil, plumbago and tea, amounting in 1882 to \$17,055,670.

Hong Kong ("Fragrant Streams"), an island off the south-east coast of China, at the mouth of Canton River. Area, 32 square miles; population (1881), 160,402. It is separated from the main land of China by a narrow strait (Ly-ee-moon Pass). The opposite peninsula *Kowloon*, ceded to England in 1861, forms part of the colony. This is one of the finest harbors in the world and a military and naval

station for the protection of British commerce; the centre of trade in many kinds of produce—chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, etc. It is a free port, has splendid docks, and is fortified. In 1882, shipping aggregating 5,000,000 tons, entered this port. The exports to Great Britain, in 1883, amounted to \$5,850,930.

Labuan, an island of the Malay Archipelago, about six miles off the north-west coast of Borneo. Area, 30 square miles; population, about 6,000. There is a fine harbor. The trade consists in exchange of cloth, rice, crockery, ironware, etc., for the produce of Borneo and near islands; gutta-percha, india-rubber, birds' nests, canes, beche-de-mer, wax, etc.; sago flour is also manufactured, which, with the jungle produce, forms the export, chiefly to Singapore for the European and Chinese markets. Exports, 1882, \$3,055,525.

Mauritius is an island of the Indian Ocean, east of Madagascar, with the Seychelles groupe 940 miles distant; Rodrigues 800 miles distant, and about 60 other small dependencies, have a total area of 1,054 square miles; population, about 370,000. Port Louis, the capital, has a spacious harbor. Products: sugar, rum, vanilla, and aloe fibre. The entire trade of the island of Mauritius, amounts to nearly \$30,000,000; exports to Great Britain in 1883, \$2,074,765.

Straits Settlements. These derive their name from their situation in the Straits of Malacca, and comprise Singapore, Penang, Province Wellesley and Malacca. Total area, 1,460 square miles; population 466,000.

Singapore is an island off the southern extremity of the Malay peninsula. Area, 223 square miles; population 155,000. The town of Singapore, the seat of government for all the settlements, is a great commercial and shipping emporium, well fortified with excellent docks. It is a free port, no duties are levied upon anything; opium and spirit trade are farmed out to the Chinese.

Penang, or *Prince of Wales Island*, is off the west coast of the Malay peninsula. Area, 107 square miles; population, including Wellesley, 212,000.

*The first English Gold Coin of which any specimen is extant.

Nova Scotia, the most easterly province of the Dominion, is a peninsula, with area of 20,937 square miles (including Cape Breton Island), one-fifth part of which consists of lakes, rivers, and inlets of the sea. It is connected with New Brunswick by a low, fertile isthmus. Total population (1881), 440,572. The harbor of Halifax (the capital) is not surpassed by any in the world. It is the principal naval station of Great Britain in North America, and an extensive dock-yard is there located. Coal and iron ores are plentiful. The fisheries are upon the eastern coast. *Cape Breton Island*, incorporated with Nova Scotia, has an area of 3,120 square miles, and a population of 34,262. Sidney is its principal town.

New Brunswick comprises an area of 27,174 square miles; population (1881), 321,223. Its forest products and fisheries furnish a revenue for the inhabitants. Coal is abundant; antimony, copper, iron, manganese, and other valuable minerals are found in considerable quantities. The chief city is St. John. Capital, Fredericton.

GREAT BRITAIN.

Province Wellesley, on the main land, opposite *Penang*, is a strip of coast, about 45 miles in length, with some land south of the Krian River, and a large district called the Dindings. It has an area of 270 square miles, is under the authorities of Penang, and in a high state of cultivation, compared with the neighboring territory.

Cyprus, an island of the Levant, at the eastern end of the Mediterranean Sea, about 50 miles from the coast of Asia Minor, and 60 miles from its north-east extremity to the port of Latakia on the Syrian coast, with which it is connected by submarine telegraph cable; the distance to Port Said at the entrance of the Suez Canal, is 240 miles. Area, estimated 4,000 square miles, with population in 1831, of 185,870. The principal productions are cotton, wine, grain, carobs (or locust beans), and fruits. In olden times it was celebrated for its mineral wealth, the copper being of superior grade; the mines were long abandoned, but are now being again worked; large quantities of salt are obtained from salt lakes near Larknaka. Exports: cotton, wine, salt, locust-beans, wheat, barley, wool, silk, spirit, sponges and raisins. Cyprus still forms part of the Ottoman Empire, but the government is administered by England, and will be while Russia holds Batoum and Kars. The Sublime Porte receives a yearly subsidy of \$438,430. In 1883, the exports amounted to \$1,451,050.

Ontario and Quebec, or Canada Proper. The area of these two provinces is 290,421 square miles (Ontario 101,733; Quebec 188,688); Upper or Western Canada is now Ontario, Lower or Eastern Canada is Quebec; and these are separated by the river Ottawa. Quebec also includes the Isle of Anticosti and the Magdalen Islands in the Gulf of St. Lawrence. The inhabitants of Lower Canada are mostly of French descent; those of Upper Canada chiefly British. The timber trade has long been, and still is, the most valuable of its commerce, though agriculture and cattle raising are fast growing in importance; the fisheries also yield great revenues. The mineral resources are not fully developed, but a large section, especially the shores of Lake Superior and Lake Huron produce gold, silver, cobalt, iron, lead, zinc and copper; sandstone, limestone, slate, and marbles of every color are found. Petroleum is produced in large quantities. Agriculture receives most attention in Ontario, and farm products as exports, are divided about equally between the United States and Great Britain; Montreal, Quebec and Toronto being the great centres of distribution. Kingston occupies a relation to the Lake trade, similar to that of Quebec with the sea, Toronto being second in sharing this commerce. Montreal commands a vast overland system of communication by canal and railway.

THE DOMINION OF CANADA, since 1867, a confederated government, embracing the British North American Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, Manitoba, British Columbia, North-West Territory, Vancouver's and Prince Edward Islands. This territory, about as large as Europe, stretches from the Atlantic to the Pacific Ocean, and the area is estimated at 3,580,290 square miles. Its exports are agricultural products, animals, and produce thereof; woods and lumber, fish, manufactured goods and gold, silver, copper, cobalt, iron, zinc, lead, sandstones, limestone, slate and marbles, amounting in 1883 to \$93,407,072. Population, 4,352,080. There is no mint in Canada. In 1882 (latest report) of gold coin and gold bullion there was imported \$1,228,752; and exported \$476,192; of silver coin and silver bullion there was no export, and the import amounted to \$880,000. \$950,000 of gold was produced the same year from the mines. The paper circulation outstanding was, Government, \$16,115,084, banks, \$36,501,695. The average of duty on all imported commodities, subject to duty, was 17.5 per cent, in 1883.

Manitoba (formerly the Red River Settlement) is situated about the middle of the continent. The Canadian Pacific R. R., when completed, will give an important impetus to the rapid development of this province, which will become a great agricultural country. Area 123,000 square miles; population (1883), 125,000. Capital, Winnipeg.

Prince Edward Island is divided into three counties (King's, Queen's, and Prince). Area 2,133 square miles; population (1881), 108,091. Agriculture, fishing and raising of horses and sheep are the principal occupations of the inhabitants. Capital, Charlottetown.

British Columbia, on the west coast of North America and between it and the Rocky Mountains, includes Vancouver Island and Queen Charlotte's Isles. Total area, 341,305 square miles; population (estimated), 49,459. It produces gold, fine timber and coal. The fur trade is most extensive, the skins exported being chiefly those of the mink, marten, sable, silver-fox, bear, beaver, sea and land otter, seal, deer and elk, with others of minor value. *Vancouver Island* has an area of 12,500 square miles, mostly mountain and barren rock. Coal is abundant. Capital, Victoria.

North-West Territory comprises nearly the whole of British North America from the confines of the United States to the most northerly part of the continent and the archipelago of islands beyond. Area (estimated), 2,665,252 square miles; population, 56,446. The fur trade until recently was almost the sole occupation of the inhabitants; the country is admirably adapted to agriculture and stock-raising. It has large mineral depots; gold, iron, and coal have been found. Capital, Regina.

District of Keewatin, formed out of the North-West Territories. Area, about 500,000 square miles, of which only 30,000 are fit for culture. Population, about 10,000. Under the governor of Manitoba.

Newfoundland, an island on the north-east side of the Gulf of St. Lawrence. Area, 40,200 square miles; population (1874), 161,389. Export of codfish, and seal oils, seal skins, and copper ore, amounted in 1883 to \$5,875,000. The industries are agriculture, fishing and mining, all confined to the sea coast.

Labrador, a dependency of New Foundland, forms the most easterly part of America. Capital, St. Johns.

British Guiana includes the settlements of Demerara, Essequibo, and Berbice; situated on the north coast of South America. Area (estimated), 85,000 square miles; population (1882), 257,473. The Corentyn separates it from Dutch Guiana. The chief product is sugar, the finest known, and this forms 92 per cent. of the exports. Coffee, cotton, rum and timber are also produced. Total exports (1882), \$16,043,155. There are but two towns of consequence. Georgetown, the capital, and New Amsterdam.

British Honduras, in Central America on the Atlantic Ocean, is bounded north by Yucatan and Mexico, west and south by Guatemala, and east by the Caribbean Sea. Area, 7,562 square miles; population (1881), 27,452. Staple products, mahogany, logwood and other valuable timber; sugar and coffee, fruits and cocoa, india rubber, sarsaparilla and medicinal plants. Total exports (1883), \$1,514,845. Capital, Belize.

Austral-Asia comprises a vast number of islands, chiefly in the southern hemisphere, between the Pacific and Indian Oceans. The whole of the British colonies in this area, including Fiji (but excluding New Guinea), is estimated to contain 3,082,770 square miles, and about 3,100,000 inhabitants.

Australia, the largest island in the world, forms the main portion of Austral-Asia. It covers an area of 2,944,028 square miles, and its population in 1884 was estimated at 2,290,223. It is a rich grazing country, adapted peculiarly to the

ing of sheep, of which in 1882 there were over 71,000,000. Minerals comprise gold, silver, copper, mercury, tin, zinc, iron and coal. It is divided into five colonies: New South Wales, Victoria, Queensland, South Australia and Western Australia. The totals for all Australasia in 1882, stood: Public debt, \$496,098,410; revenue \$109,555,075; expenditures, \$100,284,115; imports \$319,221,795; exports, \$253,166,675.

New South Wales. Area, about 310,700 square miles; population (1883), 840,614. Rich in agricultural produce and stock of all kinds; sheep alone estimated at 32,000,000. In 1882, 543,596 gallons of wine were manufactured. Of wool, the great staple, 153,351,354 lbs. were exported in 1882. It also furnishes gold, silver, coal, iron, copper, tin, antimony, kerosene, cotton and tobacco. In 1883 the total exports amounted to \$83,584,805. At Sidney, the capital, is a Royal Mint. *Norfolk Island*, the home of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn's Island, is under the authorities of New South Wales.

Victoria comprises the south-east corner of Australia; its coast line extends nearly 700 miles; total area 87,884 square miles. Population (Jan. 1st, 1884), 931,900. It is the principal gold-producing colony of the island, and from the discovery of gold in 1851, to the end of 1883, the amount mined, at \$20 per ounce, amounted in value to \$1,044,252,500; other minerals, chiefly tin and antimony raised during the same period are estimated at \$4,000,000. The sheep in this colony in 1884, numbered 10,800,000, and the wool exported was 56,000,000 lbs. Agriculture and manufactures are in a flourishing condition. Melbourne, the capital, is possessed of a mint and all the public buildings which mark advanced civilization and culture. Ballarat, Sandhurst and Geelong are the other important towns.

South Australia is somewhat of a misnomer, for, since 1863 the boundaries of this colony have included the entire centre of the Australian continent from north to south, comprising an area of 903,690 square miles, with population (on June 1st, 1884) of 307,917, exclusive of aborigines. It is an agricultural and pastoral province; breadstuffs and wool constituting three-fourths of its exports; in 1882 of native-grown wool was exported, 42,000,000 lbs.; of bread stuffs, 242,261 tons, and minerals amounting to \$2,105,720. Vine culture and the raising of horses, sheep and cattle are important, and growing pursuits. Mining is actively pushed, copper being the chief mineral; the Moonta, Wallaro and Burra mines being the most extensive. Total exports (1883-84), \$25,688,400. Capital, Adelaide.

Queensland has an area of 668,224 square miles, and population in 1883, of 287,475. Its climate is such that the productions of both temperate and tropical countries can be cultivated with success, 87,000 tons of sugar were produced in 1883. Exports consist of wool, gold, tin, copper, arrow root, preserved meats, beche-de-mer, rum, sugar and timber, amounting in 1883, to \$26,383,040; gold, copper, tin.

lead, quicksilver, antimony and coal mines are in several districts, many of the indigenous plants possess remarkable medicinal properties; the pasturage is of the best. In 1883, there were in the colony 230,154 horses; 4,246,141 cattle; 11,507,473 sheep. Capital, Brisbane.

New Guinea, also called *Papua*, is next to Australia the largest island on the globe. It lies about 80 miles north of Queensland, from which it is separated by Torres Strait, and the area is computed at 303,230 square miles; the inhabitants are aborigines now undergoing missionary treatment. The island was formerly taken possession of in the name of the Queen of England and the government of Queensland, on April 4, 1883.

Western Australia, formerly the "Swan River Settlement," includes all of the continent W. of long. 120° E. Area, 975,824 square miles, mostly covered with heavy growth of rare and valuable timber. In certain districts the vine, olive and fig are cultivated; silk growing is a flourishing industry and there are sections of good wheat-growing soil; magnetic-iron, lead, copper and zinc ores are found in large quantities. The exports are of wool, jarrah timber, lead, copper ore, whale oil, guano, sandalwood, pearls and pearl shells, and they amounted, in 1882, to \$2,-915,275. Capital, Perth.

New Zealand, in the South Pacific Ocean, is North Island. Area, 45,687 square miles; Middle Island, 57,579 square miles; Stewart's Island, 760 square miles (and only 295 inhabitants), and an adjacent group named the Chatham Islands, containing 377 square miles; these all constitute the colony of New Zealand, with total area of 104,403 square miles, and (in January, 1884), 540,877; every fruit, flower and edible flourishing in Great Britain can here be raised. Some very valuable timbers are peculiar to this island; wool is largely produced; gold has been found in many districts, and a rich iron ore, in the form of iron sand exists in Taranaki; coal is widely distributed, and copper is met with in several sections. Exports, 1883, \$35,500,000. Capital, Wellington, in the North Island.

Tasmania, an island off the south end of Australia (in the South Pacific Ocean), separated from it by Bass's Straits, in which are the Furneaux Group and King Island, included in the colony. Area, 26,215 square miles; estimated population (Jan. 1st, 1884), 126,220. The surface is mountainous and covered with forests of large and beautiful woods. Chief products, wool, gold, tin and fruits. Iron-ore exists in most districts, and coal is very generally distributed. Exports (1883), \$7,936,945.

Fiji Islands, a group of 225 islands in the South Pacific Ocean. 1,100 miles north of New Zealand, extending 300 miles from east to west, and 240 miles north to south, 80 of which are said to be inhabited. Estimated gross area, 8,034 square miles. All are of volcanic origin, with loft mountains and well wooded. The principal are Viti Levu (Great Fiji), and Vanua Levu (Great Land), each about 300 miles in circumference. The island of Rotumah was annexed in 1881. Vegetation is remarkably luxuriant, the chief productions being the breadfruit tree, banana, plantain, cocoanut, sugar-cane and arrowroot. Cotton, sugar, pearl-shells, maize, beche-de-mer, and copra and cocoanut oil are the chief exports, amounting in 1883, to \$1,759,990. Population (1883), Europeans, 3,513; natives, 116,000; East Indian and Polynesian laborers, 10,381. Capital, Suva, in the island of Viti Levu.

British Possessions in the West Indies. The West Indies are an immense number of islands and islets, about 1,000, some of them mere rocks, forming an archipelago between North and South America, separating the Caribbean Sea from the Gulf of Mexico and the Atlantic Ocean. They are divided into four groups: 1, the Bahamas, south east of Florida, extending toward Hayti; 2, the Greater Antilles, between the Bahamas and Central America, comprising Cuba, Hayti, Jamaica, and Porto Rico, with a few neighboring islets; 3, the Lesser Antilles or Caribbe Islands, extending in a crescent from Porto Rico to the mouth of the Orinoco; by some called collectively the Windward islands; by others, and the English government, divided into the Leeward and Windward islands, respectively north and south of latitude 15°; and 4, the group off the coast of Venezuela (the Leeward islands of the Spanish explorers). To Great Britain belongs: the Bahamas, Jamaica, and most of the Lesser Antilles; area, 13,754 square miles; population about 1,250,000. Hayti is independent. Cuba, Porto Rico, and dependences belong to Spain. France owns Guadaloupe, Desirade, Martinique, Marie Galante, Les Saintes, N. part of St. Martin's, all in the Lesser Antilles. Curacao, Buen Ayre, Oruba, Los Roques, St. Eustatius, Saba and S. part St. Martin's (Lesser Antilles), are possessions of Holland. St. John's, St. Thomas and Santa Cruz (Virgin Islands) are under Denmark. St. Bartholomew (Lesser Antilles) is ruled by Sweden; and Margarita, Tortuga and a few more off Venezuela, belong to that country. The total area is 98,554, with population of 4,222,297. The total exports, in 1831, amounted to \$28,928,620.

Jamaica (aboriginally *Xaymaca*, or Land of Wood and Water) lies in the Caribbean Sea, about 90 miles to the south of Cuba. Area, 4,193 square miles; population (1881), 580,804; most of the staple products of the tropics are raised.

Exports: sugar, rum, coffee, fruit, pimento, dye and other woods, amounting in 1882, to \$7,745,240. Kingston, the largest port and town, is the capital. Turks and Caicos (Cayos or Keys), part of the Bahama group, annexed to Jamaica in 1873, from which the principal island, Grand Turk, is 480 miles distant. They have an area of about 223 square miles, population (1881), 4,776.

Trinidad, the most southerly of the W. I. Islands. Area, 1,754 square miles; population (1881), 153,128; the best harbor in the West Indies; an asphalt lake, 90 acres in extent, near the village of La Brea, contains a seemingly inexhaustible supply of that article. Products: sugar, cocoa, molasses, rum, coffee, cocoanuts, pitch, various woods and choicest fruits; coal is found in Manzanilla. Exports (1883), \$18,433,350. Chief town and port of entry, "Port of Spain."

The Leeward Islands, those under British authority, are Antigua, Montserrat, St. Christopher, Nevis, Dominica and the Virgin Islands, forming part of the group of the Lesser Antilles. These six, previously separate colonies, were formed into one in 1871. The Federal colony contains about 119,546 inhabitants; the revenue is \$578,320. *Antigua* is the most important of the confederation. Area, about 108 square miles; population (1881), 34,000. Exports: molasses, rum, sugar, tamarinds, arrowroot and cotton, amounting in 1883, to \$1,113,380. Principal town, St. John. *Barbuda* is 30 miles north of Antigua, and a dependency thereof. Area, 75 square miles, population 900. Flat and fertile, producing corn, cotton, pepper and tobacco.

Montserrat, 27 miles south-west of Antigua. Area, 47 square miles. Two-thirds of this island are mountainous and barren; the rest is well cultivated. Exports (1883), \$157,470. *St. Christopher's*, popularly called St. Kitts, about 46 miles west of Antigua. Area, 68 square miles; population (1881), 41,000; sulphur is found in its mountains; sugar, rum and molasses are the only productions. Exports (1883), \$1,161,335. *Nevis*, which is but a single mountain rising 3,200 feet above the sea, has an area of 45 square miles. *Anguilla* (or Little Snake) is about 60 miles north-east of St. Kitts, of which it is a dependence. Area, 35 square miles; population, 100 whites, 2,673 blacks; salt and phosphate of lime, cattle and garden stock are the only productions. *Dominica*, or *Dominique*, the largest island of the confederation, 95 miles south of Antigua, has area of 290 square miles, and population in 1881, of 28,211. Principal productions: sugar, coffee, cocoa, cotton, tobacco, molasses, rum, lime juice, fruit, and cabinet woods. Exports (1883), \$316,420. *The Vir-*

gin Islands; of these belonging to Great Britain, *Tortola* is the largest; then *Virgin Gorda*, and next *Anegada*. Total area, 64 square miles. They furnish good pasturage for cows, sheep and goats; sugar and cotton are raised in small quantities. A valuable mine of copper has been worked at *Virgin Gorda*. Exports (1883), \$61,635.

SILVER. GREAT BRITAIN. PLATE 19.

A general description of the coins upon Plate 19, is all that will be necessary; they are given here as types only of coinages under the early rulers of Great Britain: HENRY VII, from 1509 to 1547, tampered with the coins of his Kingdom, and so outrageously debased them that they are rated from half their face value to nothing. RICHARD III, from 1483 to 1485. The coins of this King are very rare. His standard was 11 oz., 2 pennyweights fine silver and 18 pennyweights alloy. HENRY VII, from 1485 to 1509. His coinage was in the same proportion as that of Richard III. EDWARD IV, from 1461 to 1483. Several changes in the coinage took place during this reign, and the pound sterling was debased 25 per cent. HENRY VI, from 1422 to 1461. His standard was the same as that of Richard III. HENRY IV, from 1399 to 1413. He debased the pound sterling 20 per cent. RICHARD II, from 1377 to 1399. This king kept his standard at 11 oz., 2 pennyweights fine silver and 18 pennyweights alloy. His money is very rare. HENRY V, from 1413 to 1422, the standard of Richard III. EDWARD I, II or III, from 1273 to 1377. All these Kings indulged in more or less variation in the value of their money. HENRY I, from 1100 to 1135, or of Stephen; authorities differ. ROBERT, EARL OF GLOUCESTER, about same date as Henry I and Stephen. STEPHEN from 1135 to 1154. History records that this King greatly debased his coin. WILLIAM I, from 1066 to 1087. This "WILLIAM THE CONQUEROR," coined nothing but the penny of mixed silver and standard as followed by Richard III. HENRY I, from 1100 to 1135. Whatever changes this ruler is known to have made in his money was in favor of honesty and the people. Of course these coins are all excessively rare, and command high prices from collectors. It would be useless to give their *money* value at this date.

ENGLISH "MONEY OF NECESSITY" AND "SIEGE PIECES."

During the reign of Charles I of England, the ill fortunes of that King obliged him to melt for coin even his own and the plate of the colleges; and about 1644-45, he was so driven for the "sinews of war," and so destitute of the means for minting money, that irregular pieces cut direct from the plate

contributed by his partisans were stamped in a rude manner by them and himself, and issued with numerals indicating the value by the weight of metal they contained. Many writers have ignored this "circulating medium" on account of the silence in regard thereto maintained by contemporary documents; but lately discovered evidence proves that it did exist. In the newspaper of that time, *The Kingdom's Faithful and Impartial Scout*, dated February 5th. 1648, is an item regarding some of this money found on a royalist prisoner by the Republicans, which describes it exactly: The "siege money" is distinguished from the "necessity coinage" by the letters O. B. S. for "Obsessa" (besieged) generally found on the true pieces. Some of this irregular coinage was struck at Dublin, known as the "Inchinguin money;" it can easily be identified on plate. Nos. 2 and 14 are pieces struck at Scarborough Castle; No. 13 has upon it an unknown castle and the words *Caroli Fortuna Revivam*; No. 6 shows the castle of Pontefract, and bears the O. B. C. mark of the siege piece; No. 2 is a crown piece struck at the Castle of Dublin; No. 9 is a coinage of Dublin Castle, also with only the numerals denoting the pennyweights and grains, with no other device or legend; No. 12 is a crown piece, the "V. S." indicating five shillings, and bearing these marks alone; Nos. 4 and 7 are pieces rudely struck upon hastily cut squares of plate, stamped with their money value and rude representations of what is believed to be Colchester Castle. These pieces form an interesting page in the history of modern coinage, and hence are here presented.

FOREIGN "OBSIDIONAL" MONEY.

Money of analogous character to that of the civil war times of Charles I of England has been issued in other countries. It is merely mentioned here without illustration. In 1598 Charles, Duke of Sundermania, during the war with Sigismund III, King of Poland, issued "necessity" or "siege" money, in gold and silver. John Frederic, the Elector, while besieged in Leipsig, 1547, by Duke Maurice of Saxony, was obliged to strike obsidional gold, and Gustavus I of Sweden, after his escape from imprisonment by Christian II of Denmark, struck copper money of the same character. Archduke Ferdinand of Hungary, resorted to like means when besieged in Vienna, by the Turks in 1529. The French fortress town of Landau, besieged in 1702, and Osanaburg, Bavaria, in 1633, likewise struck such coin. Frequently the obsidional money was of base metal; in such cases, like the Gun money of James II of England; they bore the values that belong to gold or silver. On some of these pieces were the words: *Extremum subsidium*, the last resource. So far as known these

Without dates there are pieces struck in Bearn, Flanders, Lyons, Navarre, and St. Domingo.

The Windward Islands, of the Lesser Antilles, under authority of England are: Barbados, St. Vincent, Grenada, Tobago, *St. Lucia*, and their dependencies, with about 285,000 inhabitants. *Barbados*, the most westward of the West India Islands has, of area, 166 square miles; population (1881), 171,860. Products : sugar, molasses and rum. It is the residence of the Governor-in-Chief of the Windward Islands, and the head-quarters of England's forces in the West Indies. Capital, Bridgetown. *St. Vincent*; 90 miles west of Barbados; area, 132 square miles; population (1881), 40,548. Products: sugar, molasses, rum, arrowroot, cocoa, coffee and cotton. Exports (1883), \$833,750. *Grenada* (and the Grenadines). Grenada is about 96 miles north of Trinidad, 68 miles south south-west of St. Vincent and 100 miles south-west of Barbados. Area, 120 square miles; population (including the Grenadines), in 1881, was 42,400. This island was discovered by Columbus in 1498 and named Ascension. The soil is very fertile. Products: cocoa, cotton, spices, sugar, rum, coffee and fruits. Large numbers of turtle are caught and exported, and whales abound. Exports (1883), \$966,620. The *Grenadines* are a chain of small islands between Grenada and St. Vincent (within which Governments they are in-

cluded) comprising an area of 13 square miles ; producing roots and live stock ; the largest of them is Carriacou. *Tobago*, most southerly of the Windward group, is about 75 miles south-east of Grenada, 18½ miles north-east of Trinidad, and 120 miles south south-west of Barbados. Area, 114 square miles ; population (1881), 18,051. Two-thirds of the island are still covered with primitive forests, comprising many varieties of hardwood and ornamental trees. Sugar, rum, molasses, cocoa, coffee and cocoanuts are the staples of trade. Exports (1883), \$240,180. *St. Lucia*, largest of the Windwards, is about 90 miles west, north-west of Barbados, and 25 miles north of St. Vincent. Area, 250 square miles, and population in 1884, of 40,532. Exports (1883), \$1,069,115. *Bahamas*, a chain of about 20 inhabited islands, and an immense number of islets and rocks, lying between 21° 42'—27° 34', N. latitude and 72° 40'—75° 5' W. longitude, comprising an area of about 5,794 square miles, and a population in 1881, of 43,521. The principal islands are New Providence (containing the capital Nassau), St. Salvador, Great Abaco, Great Bahama, Long Island, Eleuthera, Mayaguana, Harbour Island, Great Inagua, and Andros Islands. Exports : salt, sponges, pine-apples, tomatoes and oranges, amounting annually to about \$750,000. The *Bermudas*, or Somers Islands, are a cluster of about 300 small islands (only 15 or 16 being inhabited), situate in the west of Atlantic Ocean, in 32° 20' N. latitude and 64° 33' W. longitude. Area, about 41 square miles and population, in 1883, of 14,667, exclusive of army and navy. The nearest point of main land is Cape Hatteras, North Carolina, U. S. A. Bermuda possesses a strongly fortified dockyard, where the British North American squadron refits. Products: onions, potatoes and arrowroot, fish and turtles. Exports (1883), \$50,000. Hamilton is the principal town.

British Possessions in Africa. *Cape Colony.* The Cape of Good Hope is a small promontory near the south-west extremity of Africa, but the extensive colony of that name is washed by the Atlantic and Indian Oceans on the west and south, and is bounded by the west degree of longitude 22° by the Orango River, from which point the limiting line runs north-eastward across that river. Including the adjoining territories in the "Transkei," it reaches in S. latitude from 28° to 34° 50', and in E. longitude from 16° 25' to 29°. The area, including Transkei and Griqualand west is 211,741 square miles; the estimated population is: Colony (limits as they existed in 1875), 811,450; Griqualand west (annexed in 1880), 49,101; Transkei (portion formally annexed), 58,623; Griqualand east (annexed), 75,353; Transkei (portion not formally annexed), 25,592; Tembuland (not yet formally annexed), 98,

530. Estimated total (1884), 1,129,648. The inhabitants of Cape Colony proper are chiefly employed in the production of wool and wine, the rearing of horses, sheep, cattle and ostriches, and the culture of wheat, barley, oats, etc. The mines yield copper, manganese, coal and diamonds. Principal towns: Capetown (the capital), Port Elizabeth, East London, Port Alfred, Mossel Bay, Port Nolloth, Simons' Town, Knysna, Plettenbergs Bay, and Port St. Johns. Exports (1883), \$22,044,140. The *Trankeian territories* stretch from the Kei to Natal, and are bounded on the north by the lofty Quathlamba Mountains. The following territories are either formally annexed to the Cape Colony, or subject to control of its authorities: *Griqualand East*, *Fingoland* and the *Idutywa Reserve*, *Geulekaland* and *Tembuland*, *Port of St. John's* and *Walfish Bay*.

Natal. This colony lies on the south-east coast of Africa, about 800 miles from the Cape of Good Hope, the Drakensberg Mountains forming its western boundary, separating it from the territory of the Cape Colony and the Orange River Free State. Area, 18,750 square miles, with seaboard of over 200 miles; population, whites, natives and Coolies, in 1883, was 418,731. It has only one harbor on its coast, Durban, or Port Natal. Products: sugar, coffee, indigo, arrowroot, ginger, tobacco, rice, pepper, cotton, fruits and grains; sheep, horses and cattle are reared in large numbers; the minerals are coal and lime; large forests of valuable timber abound. Exports: wool, sugar, coffee, ivory, hides and skins, and ostrich feathers, amounting in 1883, to Great Britain alone, to \$3,465,585. Pietermaritzburg is the capital.

British West African Settlements consist of Sierra Leone and the settlements on the Gambia.

GREAT BRITAIN. SCOTLAND.

Silver. XIX. 24

GREAT BRITAIN.

Sierra Leone comprises the peninsula of that name, Sherboro Island, with some contiguous tracts and territory on the sea coast extending to, and including **Mannah**, which adjoins the Republic of Liberia and the Isles de Los, the whole situated between $7^{\circ} 20'$ — $8^{\circ} 40'$ N. latitude, and $12^{\circ} 20'$ — $13^{\circ} 20'$ W. longitude, embracing an area of over 600 square miles, with a population, in 1881, of 60,546, of whom only 163 were resident whites; tropical fruits and plants grow luxuriantly; coffee and cocoa have been introduced by the British. Exports: bennie seed, cocoanuts, ginger, groundnuts, india-rubber, gum copal, hides, palm oil, palm kernels, and colanuts, amounting in 1882, to \$2,100,065. Capital, Freetown. **Gambia**, this settlement consists of the Island of St. Mary, British Combo, Albreda, The Ceded Mill, and McCarthy's Island. Area 21 square miles; population (1881), 14,150, of whom only 105 were whites; rice, cotton, maize, and a kind of millet, called Kous, are produced in the country along the Gambia River, but not sufficient for export. The principal exports are wax, hides and groundnuts.

Gold Coast Colony comprises the coast of the Gulf of Guinea from $2^{\circ} 40'$ W. to $1^{\circ} 10'$ E. of Greenwich, extending inland to an average distance of 50 miles, including an area of about 16,620 square miles and a population of over 520,000. The oil-palm grows on this coast in great profusion. Exports: gold, ivory, gum copal, monkey skins, palm kernels and oil; these are sent principally to England. The chief forts and settlements are Cape Coast, Castle, Elmina, Axim, Dixcove and Accra, the capital. Value of exports in 1882, \$1,700,095. **Lagos** is an island and port on the Slave Coast, embracing also the north coast of the Gulf of Guinea, between $2^{\circ} 50'$ and $4^{\circ} 30'$ E. longitude. It was permanently occupied to effect the complete suppression of the slave trade in the Bight of Benin, and to develop its important trade in palm kernels and oil, lead ore, indigo and canewood. Lagos is the principal town; population in 1881 was 75,270, of whom only 94 were whites. Exports (1881), \$2,300,035.

RING-MONEY.

That personal ornaments, made of the precious metals, were of a certain standard weight and passed current as *money* is certainly proved by Holy Writ. In the 24th chapter and 22d verse of Genesis, Abraham's servant, meeting Rebecca at the well, "took a golden ear-ring of half a shekel weight, and two bracelets for her hands of ten *shekels* weight of gold" and gave them to the damsel who "was very fair to look upon." Hieroglyphic sculptures of ancient Egypt also show the weighing and recording of rings, evidently passing as payment, and pictured records of past ages, relating to other nations fully sustain the opinions of numismatists, in contradiction to the dissent of certain savants, that rings of different size and metals were current money.

From the far East, to the West and North, the ring-money found its way at an early age, and Cæsar in his *Commentaries*, speaking of the money of Britain, says "they use, instead of money, rings adjusted to a certain weight," though they then had money both of bronze and gold in circulation; this related to the century preceding the Christian Era.

In Ireland the ring-money was current for years later than the period mentioned, and in Sweden and Norway it still existed in the eleventh and twelfth centuries. As most of the specimens now in collections were found in Ireland, it is probable that the use of ring-money was much more common in that country than in Britain, and its similarity to actual coinage is rendered more striking from its careful adjustment to special weight. There are small rings of exactly one-half pennyweight and so on through almost every intermediate grade up to thirteen ounces, seven pennyweight, some even containing fractional thirds, small change, as it were; a perfect money system.

GREAT BRITAIN. "RING" MONEY.

XIX. 25

GREAT BRITAIN.

The second plate illustrates different varieties of the ring-money, gold, of Ireland. The earliest were little more than pieces of wire bent round, and plain at first, the ends were later flattened or shaped into various forms, with rude attempts at ornamentation, the progress of which can easily be traced by the specimens presented. No. 10 is of cast brass, as is No. 9 also, with the rings treble joined; in No. 8 the brass rings are looped one within the other for convenience in carrying; these baser metal rings have been found in vast quantities. No. 5, which was found in a bog in County Galway, Ireland, is of gold weighing fifteen ounces, and is worth \$300. No. 7 is also of Irish production, and contains 75 dollars worth of gold.

From the small circle of bent wire the fashion and weight of the ring-money increased, and people, especially the Gallic warriors carried their fortunes upon their persons in the shape of ornaments, but always having a fixed and standard weight rendering it transferable as actual money. The torque, worn around the neck, was generally of pure gold and sometimes weighed as much as five pounds. In 1700 a specimen was unearthed at Pattingham, in Staffordshire, England, which contained three pounds two ounces of fine gold, was four feet long, very bright, and so flexible that it could be wrapped round the arm like a rope, and be easily extended to its original form; the bend which formed a hook at each end, as shown in No. 2 of Plate, served to fasten it. The other specimens are also of pure gold and probably needed no fastening, their extreme ductility causing them to retain the shape when placed on a limb, as is still the case with the bracelets and anklets worn in some parts of British India. The illustration No. 1 is of a bronze torque, found in Somersetshire, England; it weighs two pounds, and is an exact reproduction of the gold ones mentioned. Nos. 1, 3, 4, 5 are copies of other relics, discovered in 1832, and though they were soon melted and recoined into modern English money yet drawings were made from them and are here given on a reduced scale. No. 4 weighed 4lbs. 1 oz. 16 dwts. 11.66 grains; No. 3, 1lb. 4 oz. 15 dwts. 13.47 grains, and No. 5, 1lb. 4 oz. 13 dwts. 10.47 grains.

The use of ring-money is still prevalent in Africa, the Foulah-jolaf and other African tribes still bringing gold-ring money to Sierra Leone, and as a proof that the precious metal is only thus shaped to give to it a monetary character, it is a fact that these people never use rings for ornament. Ring-money has also, within the last few years been dug up in Ceylon; it is formed of a flat wire, doubled into a loop, and stamped with inscriptions such as "Sultan Ali Aadil Shah, struck at Lari, a stamped Daugh." This prince reigned A. D. 1659, and "daugh" is the denomination of a coin of his country.

In Ireland silver as well as gold ring-money has been found, some being marked for division in halves. It is probable that the far greater extent of the use of this form of coinage in Ireland, over Britain, arose from the fact that the former country maintained its independence long after the Romans had subjugated Britain and re-coined every form of metallic currency into the money of Rome.

British Possessions in the South Atlantic. *Ascension* is an isolated island, of volcanic origin, situated in the South Atlantic Ocean, 7° 55' S. latitude, and 14° 25' 5" W. longitude. Area, 35 square miles. The English took possession of it in 1815. It now has a steam factory, naval and victualling yards, coaling depot and hospitals; game abounds and where the soil is cultivated, the yield is plentiful. In October, 1883, the population consisted of 89 officers, seaman and Krooman. Exports: turtles and birds' eggs. *Falkland Islands.* These, the only considerable cluster in the South Atlantic, lie about 800 miles east of the Straits of Magellan, and consist of *East Falkland* (area 2,700 square miles); *West Falkland* (2,000 square miles), and about 100 small islets, rocks and sandbanks, comprising in the aggregate 4,740 square miles, and a population in 1881, of 1,543. Exports: oil, hides, tallow, seal skins and wool. *South Georgia*, an island 800 miles E. S. E. of the

Falkland group, with an area of 1,570 square miles and several other small uninhabited islands, are comprised within this colony. Exports to Great Britain (in 1883), \$422,465.

St. Helena, probably the most familiar of all the solitary islands of the world, is in the South Atlantic, 850 miles from the nearest land, Isle of Ascension, in 15° 55' S. latitude and 5° 42' W. longitude. Its area is 47 square miles; population (1881), 5,059. It is frequented by ships for water and fresh provisions. The chief town is Jamestown. Exports to Great Britain (1883), \$7,775.

British Possessions in Europe. *Malta*, an island in the Mediterranean Sea, comprising, with *Gozo* (an adjoining island), an area of 117 square miles. It has one of the finest harbors in the world, an extensive arsenal and important dockyard, being the headquarters of the Mediterranean Fleet. Products: Corn, cotton, oranges and potatoes; also much live stock. Total population (1881), 147,209, exclusive of British troops and their families. Exports to England (1883), \$107,000.

Gibraltar, a rocky promontory, 3 miles in length, ¾ of a mile in average breadth, and greatest elevation 1,430 feet, near the southern extremity of Spain, at the entrance of the Mediterranean, everywhere fortified, connected on the north by a low isthmus with Andalusia. It is a free port and about 4,000 vessels call there annually. Total population 1881 (including 5,610 military), 23,991. Exports to Great Britain

(1883), \$196,055. *The Channel Islands* comprise the bailiwicks of *Jersey* and *Guernsey* (in the latter of which are comprehended the small islands of *Alderney*, *Sark* and *Herm*, situated off the north-west coast of France, at distances of from 10 to 30 miles). Total area, about 73 square miles; population (1881), 88,806. Exports to Great Britain (1883), \$4,031,115. *Isle of Man* (*Mona*), in the Irish Sea, nearly equidistant from England, Scotland and Ireland. Area, about 281 square miles; population, 54,089. Rich in lead, iron, blende and slate, and exports large quantities of agricultural produce.

Hellgoland (*Holy Land*), a small island in the North Sea, opposite to and about 25 miles from the mouth of the Elbe. Including Sandy Island, it is about $2\frac{1}{2}$ of a mile in circumference, with a resident population (in 1881), of 2,000. It is a favorite bathing resort and the inhabitants live on fishing and visitors.

THE GOLD COINAGE OF ENGLAND.

On Plate XIX, 9, of the *ENCYCLOPÆDIA GOLD AND SILVER COINS OF THE WORLD*, cut No. 4, $\frac{1}{2}$ Florin of Edward III will be found marked with an asterisk (*), which called attention to a note, "The first English coin of which any specimen is extant." But it is not to be supposed from this that the $\frac{1}{2}$ Florin of Edward III is the *first English gold coin*, for in the translation of M. Rapiin de Thoyras, published in 1732, there is a distinct statement that "The manuscript Chronicle of the city of London, says this King (Henry III) in 1258, coined a penny of fine gold, of the weight of two sterlings, and commanded it should go for 20 shillings." Snelling, the acknowledged authority on coins of Great Britain, in his work of 1763, says, "if this be true, these were the first pieces of gold coined in England." And the author adds "N. B. : The date should be 1257, and the value 20 pence." Maitland's History of London, issued 1789, says: "This year (1257) the King caused to be coined in London a penny of fine gold, weighing two sterlings, which is supposed to be the first gold coin in England." Other and conclusive corroborative evidence is in existence establishing the existence of this gold penny, in 1257-58. But Edward III will always have the popular honor for having coined, and issued, and circulated the first English gold coins; it was Anno 1344, that saw his "florin," or "florencia," with two leopards for

its device; and the half-florin, with one leopard, put in the hands of the people; with them also came the quarter-florin, with *fleurs-de-lis*, and the Royal helmet with a lion passant-guardant at top, the inscription round it being EDWR. R. ANGL. Z FRANCO. D. HIB; the Legend EXALTABITUR IN GLORIA. The whole florin of this date should weigh 108 grs. troy, the rest in proportion, the fineness was of 23 carats, 3 grains and a-half pure gold, and half a grain of alloy, that is 191 parts were fine, and one part alloy, and this was the only gold used in our mints until the eighteenth year of Henry the Eighth. Anno 1622 or for more than 180 years, and in general is called the old standard of England. The florin was current for 6 shillings; $\frac{1}{2}$ florin, 3 shillings; $\frac{1}{4}$ florin for 18 deniers or pence.

The noble followed the florin; issued by the same King, the designs on which are well illustrated in our Plate XIX. 9, of English gold. Richard II (1377 to 1399) made no alteration in the style or value of his grand-father, Edward III, except in the inscription, on the Obverse of the noble it being RICARD DI GRA REX ANGL. Z FRANCO. DNS. HIB. Z AQT.; on the half-noble is found, RICARD DEI. GRA. REX. ANGL. DNS. HIB., and on the quarter-noble, RICARD. DI GRA. REX. ANG.

HENRY IV and V coined the same types of gold, in every respect, as their predecessors, except that an II is placed in the centre of the cross on the Reverse.

HENRY VI, during his short restoration to power, struck the angel in imitation of those of Edward IV, with the slight difference in the letter H and the *fleur-de-lis*, one each side of the mast, instead of an E and a rose.

EDWARD IV made some very decided changes in the noble and half-noble; he had constantly a square flag on the stern of the ship, with E upon it (this had always been in the centre of the Reverse), and he placed a large rose on the side of the vessel where none had previously appeared. The Reverse also he changed, a sun or star, with full-blown rose, replaces the cross which formerly occupied the centre. This King in the fifth year of his reign (1465) began to coin money having the arch-angle, St. Michael, trampling upon and piercing the dragon. In the fourth year of this reign the noble, which for 120 years had held its original value of 6 s. 8 d., was made current for half as much more, or 10s., and was given the name of ryal, also rose ryal and rose noble.

RICHARD III coined no "nobles," but only the "angel," which differs in no wise from that of his brother, Henry VII, (1485), changes the "noble" in many details of the ship, introducing the semi-dragon at the head and stern of the ship. The "sovereign," a double ryal, was first coined during this reign. (See gold plate, Great Britain, XIX 8.) The ryal was current for 10 shillings.

· GREAT BRITAIN, N. A. COLONIES. Silver. XIX.

29%

at this time. the sovereign for 20 shillings, or one pound sterling; the double sovereign for 40 s.; the angel, 6s. 8d., as before.

HENRY VIII: no "nobles," or "ryals" were issued by this King; he coined the double ryal, or sovereign, and introduced the *crown* into the English series. The sovereign was current for 20 s., or 1 £ sterling, the quarter, or crown, for 5 s., and the half-crown to 2 s. 6 d. Gold was raised only about $\frac{1}{4}$, while the silver was inflated $\frac{2}{3}$; a profit of nearly 60 per cent. being made by exchanging silver for gold.

EDWARD VI (1547) coined the same pieces as his father, Henry VIII. Gold was raised $\frac{1}{4}$, bringing the proportions of fine silver and fine gold to 1 as to 5 $\frac{1}{2}$. During this reign the date was first placed on coins of the English series.

MARY, 1553: No change in general design of sovereign or double ryal. Silver raised in proportion to gold to 1 to 11 $\frac{1}{16}$.

ELIZABETH (1558) made many unimportant changes in her coins; issued the pound sovereign, and made the proportion of fine silver to fine gold, in the 43d year of her reign to be as 1 to 10 $\frac{1}{11}$; previous to which time it had been as 1 to 11 $\frac{1}{16}$.

No. 4; 20 cents of Newfoundland, 72 grs. weight, 66 grs. pure—13 cents. No. 5; 10 cents of Newfoundland, 36 grs. weight, 33 grs. pure—6 $\frac{1}{2}$ cents. No. 6; 10 cents of Canada, 35 grs. weight, 32 grs. pure—6 $\frac{1}{2}$ cents. No. 7; 25 cents of Canada, 89 grs. weight, 83 pure—17 cents.

JAMES I (1603) shows the bust of the King in armor, on sovereigns. He also issued the unite, or unite, the half-unite, called a double crown; the quarter, called the Britain crown, and the half-quarter, called the half-crown. The sovereign here is for the first time called the rose ryal. The angel type is the same as before. By proclamation of Nov. 1611, he raised the nominal and true value of gold to 10 per cent.

CHARLES I coined but little gold in his reign; the proportion of fine gold to fine silver was 1 to 13 $\frac{1}{11}$.

The COMMONWEALTH gold coin are in weight, fineness and value, exactly similar to those of Charles I.

BURMESE COINS, Silver, all 925 fine. No. 1; 1 Rupee, 180 grains weight, 168 grs. pure—35 cents. No. 2; 1/2 Rupee, 45 grs. weight, 42 grs. pure—84 cents. No. 3; 1/4 Rupee, 90 grs. weight, 84 grs. pure—17 1/2 cents. No. 4; 1/8 Rupee, 22 1/2 grs. weight, 21 grs. pure—4 cents.

CHARLES II coined his first gold and silver money, with the hammer until March, 1663, when the mill and screw gave him better pieces. The proportion of gold to silver during the reign of this King was as 1 to 14 3/4.

JAMES II (1685) coined the guinea, half-guinea, two-guinea and five-guinea pieces, all of weight and fineness corresponding with those of Charles II.

WILLIAM AND MARY (1689) placed their busts on the coins, but made no other changes. William III (1694) followed the former so far as regards coinage.

ANNE (1702) altered the style of the coin to exhibit her portrait; and in her reign the proportion of silver to gold stood as 1 to 15 10/16 2/7.

GEORGE I (1714) continued the same coinage, with a fall of 2 1/2 per cent. in gold value.

GEORGE II: The only alteration in the portraiture.

GEORGE III: Change in face only; proportions of silver to gold, as 1 to 15 10/16 2/7.

THE SILVER COINS OF ENGLAND.

It has been the commonly accepted opinion that prior to the arrival of Cæsar in Britain the people of that island possessed no coined money, and used certain substitutes therefor. In the British Museum there is a manuscript of Cæsar, of about the tenth century, in which can be read this passage: "*Uuntur aut ære aut nummo aureo aut annulis ferris ad certum pondus examinatis pro nummo.*" "They use either brass money, or, instead of money, iron rings adjusted to a certain weight." This certainly implies, as plainly as words can express, that the Britons *did* use actual coin, and further proof has been established by the discovery, in different places, and at various times, of gold, silver and copper coins, which, in type, form and fabric, bear not the least resemblance to any model introduced by the Romans. That these early pieces are of Greek origin is certain, they being thick, dished, and in many respects similar to the Grecian; that they were struck in the island of Britain is almost equally certain, because they have all been found there, and in no other country, and there is no period after the occupation by the Romans that they could have been made. It is probable that, in commerce with the Phœnicians, or intercourse between the Britons and Gaul, Grecian coins were introduced into the island and were there coarsely imitated by the native artists. When communication was established with the Romans this rudeness was improved upon and Roman letters were introduced until, under Cunobeline, they attained their highest perfection and disappeared entirely when actual Roman coins became the established currency, upon the occupation by Julius Cæsar in 55 B. C. A considerable number of these pieces can be seen in the British Museum.

COINS OF THE KNIGHTS OF MALTA.

THE HOSPIOTALER BROTHERS OF ST. JOHN THE BAPTIST OF JERUSALEM, Knights of the same title; Knights of Rhodes and Knights of Malta, are the several names borne at different periods, of the most celebrated Order of the middle ages, which combined religious and military organization and work.

In 1018, A. D., the Calif of Egypt permitted to build and dedicate to St. John the Baptist, a hospital at Amalfi, to receive European pilgrims to the Holy Sepulchre. The nurses were known by the title first given above. They afterwards assumed the name of Knights of St. John. By the Seljuk Turks the hospice was captured, plundered and held until the conquest of Jerusalem in 1099 by Geoffroy de Buillon, who found Gerard, the first superior, in prison. Reorganizing the order, Gerard recruited it considerably from the rescuing Crusaders, and upon all the members taking vows of poverty, chastity and obedience before the Patriarch of Jerusalem, the institution, in 1113, was sanctioned by Pope Pascal II, and later to the obligation was added the duty of fighting against the infidels and defending the Holy Sepulchre.

As the force grew in strength it became necessary to increase its accommodations and to add to its power and influence, various hospices, or *commanderies* were established in different maritime towns of Europe, and subsequently the Order was divided into eight languages. Provence, Auvergne, France, Italy, Aragon, England, Germany and Castile; each nation having several Grand Priors, which controlled a number of commanderies. Persons of the highest rank and great fame attached themselves to the Order, and its wealth became immense.

In 1187, when Saladin captured Jerusalem, the Knights retired to Margat, in Phœnicia. They were forced to retreat again to Acre, in 1285, and yet again, in 1291 to Limisso.

Under Grand Master Foulkes de Villaret, the Knights, aided by Crusaders from Italy, took from the Greek and Saracen pirates, the Island of Rhodes and seven others adjacent, and from there they fought the Saracens successfully, until 1523, when they were obliged to surrender Rhodes to Sultan Solyman, after which they retired, first to Candia, and afterwards to Viterbo.

The Island of Malta, with Tripoli and Gozo, were given the Order by Charles V, in 1530, and they waged continual war therefrom against the Turks for many years.

Through degeneracy in the moral character of its adherents the power and number of the Knights declined, after the Reformation, and in 1798 Malta was surrendered to the French, the wealth and lands still belonging to them being soon after confiscated in almost all the European States.

The Order still exists, to some extent in Italy, Russia and Spain, the Chief, called Deputy Grand Master, residing in the later country. No Grand Master has been appointed since 1801.

The monkish habit and cowl, with Maltese cross on the left breast and golden cross in centre, was the first dress of the members; red surcoats, with silver cross on breast and back, was their military costume. The badge of the Knights is a white enameled, gold-edged, Maltese cross, with various emblems thereon in signification of rank, country, &c. The money coined by the Order at different dates and under the several Grand Masters, is described in the tables and represented on the Plates.

Under the Romans it was very natural that the coins of that power should be substituted for all others, and Gildas asserts that an edict was issued and enforced ordering that all money in the island should bear the image and superscription of the Roman emperor. The immense number of pieces of this class now in existence prove this statement.

About the year 450, after the final departure of the Romans, their money continued to circulate and the earliest coins of the Saxons, their successors, are the silver *Sceattæ*, but it is uncertain if they were made there or imported. On the establishment of the several kingdoms of the Heptarchy, money was struck in each of them, of definite form, bearing the names of the respective kings, thus enabling the numismatist to assign to them, with a great degree of probability, their proper period and locality. The earliest of these are of the

KINGS OF KENT, of whom the first was:

Ethilberht I; from 568 to 615. There is only one coin known of this king, a *sceatta* of silver, and then there is a series attributed to *Egberht*, king from 665 to 673, which some ascribe to the division of Northumbria; the only certain Kentish coins that can with certainty be next thus classified are those of *Ethilberht II*; from 725 to 760. This king commenced his reign united to *Edbert*, but from 749 he ruled alone. But one piece is ascribed to him, bearing the wolf suckling Romulus and Remus, and its genuineness is much suspected. The next: *Eadbearht*, or *Ethelberht*, surnamed *Proen*; from 794 to 798. Pennies alone are found of this king, and the names of three moneyers are known.

Cuthred; from 798 to 805, gives only pennies, and five of his moneyers names have been deciphered.

Baldred, 805 to 823, was the last king of Kent, who was subdued by *Egberht* in 823. His coins are the first known from the Canterbury Mint, and the first instance of the place of mintage being placed upon a Saxon coin.

SOUTH SAXONS.—No coinage of this kingdom has ever been discovered.

WEST SAXONS.—Certain pieces were formerly assigned to this kingdom during the reigns of kings *Ethelheard* and *Brihtic*, but it has been conclusively proven that they belong elsewhere.

MERCIA furnishes the greatest number and most uninterrupted series of any kingdom of the Heptarchy. All the coins are silver pennies, and present many varieties in types; they are of the reigns of *Eadwald*, or *Ethelbald*; from 716 to 757. *Offa*; from 757 to 796. *Cynethryth*, Queen of Offa, and *Egberht*, his son, who only ruled six months after his father's death, also left silver pennies. *Coenwulf*; from 796 to 818, left many varieties. *Ceolwulf*, 819, reigned but one year, and his pennies show the names of seven moneyers. *Beornwulf*, 820 to 824, left but a few coins, and of *Ludica*, 824 to 825, and *Wiglaf*, 825 to 830, the same may be said. Of *Berhtwulf*, 830 to 852, there are many coins, and the names of fifteen of his moneyers are known. The pennies of *Burgred*, 852 to 874, are more plenty than those of any other Mercian prince. He was driven from the throne and the power seized by his Minister *Ciowulf* who reigned, until in a short time his expulsion terminated in the independence of Mercia. His coins are very rare.

EAST ANGLES.—*Beonna*, about 750, was the first king of this district. He is called *Bcorn*, and by some *Humbcanna*, while others suppose them to be two

GREAT BRITAIN. MALTA.

Silver. XIX. 33

Published by A. M. SMITH,
Post Office Box 754,
PHILADELPHIA, PA., U. S. A.

GREAT BRITAIN.

different persons. His coins of silver, in size, appearance and form like sceattæ are very rare. After him came *Ethelred*, who had by his Queen Leofruna, *Agilbrictus*, to whom one unique penny is assigned. The history of East Anglia about the first of the ninth century, is almost totally obscured, and the names of its rulers unknown. *Beorhtric* is a king known only by a single coin. *Eadmund*, 855 to 870 leaves pennies. He was murdered and then canonized, and is commonly called St. Eadmund. *Ethelstan*, 870 to 890, was baptized in that name in 878, having been converted to Christianity. He was a Dane, named Guthrum. Pennies, the only pieces he coined, are rare. There was only one king of East Anglia after him, *Eohric*, who reigned fourteen years, but who left no coins as yet discovered.

NORTHUMBERLAND.—Here there are many peculiarities in the size, metals and denominations of the coinage. There are the *Stycas*, of metal, containing from 60 to 70 parts of copper, 20 to 25 of zinc, 6 to 11 of silver, with a little gold, lead and tin; also the sceattæ, in silver, of varied fineness, and pennies of the usual description.

Ecgfrith, 670 to 685; a styca of copper, very few in existence.

Aldfrid, 685 to 705; only two coins—a sceattæ of good silver, and a styca of mixed copper.

Eadberht, 737 to 758; these are a series of what may be called sceattæ, of a very base quality of silver, well known to collectors, and are those previously mentioned as having been assigned to Egeberht, King of Kent.

Alfred, 765 to 774; one coin formerly supposed to be of those above.

Elfcalc, 779 to 788; three coins only and their origin merely speculation.

Haraldulf, 794 to 806, is the next, the gap in date being unaccounted for: his few pieces are all genuine stycas, of base metal.

Eanred, 808 to 840; same as the foregoing, but the coins are very plenty.

Alfred, who succeeded Haraldulf and reigned two years, left no coins that are known.

Ethelred, 840 to 848, leaves stycas differing generally from those of his predecessors.

Redulf, 844, usurped and held the throne of Æthelred for a few months, during which he coined stycas of base metal. The rightful king soon regained power.

Osbert, 848 to 867, was banished in 862, restored in 867 to share the throne with *Ella*, or *Ælla*, and both were slain in battle the same year. His coins are all stycas and very rare. Of *Ælla*, are certain pieces, stycas, which may or may not be his, the claims each way being about equal.

Regnald, 912 to 944, landed and established himself in Northumbria, as above. Coins of silver, resembling the Saxon penny; very rare. He was expelled in 944.

Anlaf, 941 to 945, was called King of Ireland, the son of Guthfrith, landed 937, in Northumberland, and was defeated; 941 he was elected king by the people, and expelled by Edmund, 945. His coins are silver pennies, very rare, but the names of eleven moneyers appear on those in existence. *Anlaf*, son of Sihtric, succeeded Anlaf, son of Guthfrith; and there is some trouble in determining between the coins of the two like-named kings.

Eric, 927 to 951; son of Harold of Norway, was placed by Æthelstan as his feudatory king in Northumberland. He was afterwards expelled, but recalled and elected by the people in 949, to be again dethroned in two years, and killed. He was the last of the royal line of governors, the subsequent ones being only earls. His coins are silver pennies, and very rare. After the death of Eric Northumberland was added by Eadred to his dominions.

SAINTS.—Before giving a list of the coins struck by the sole monarchs, it is proper here to mention a few pieces bearing the names of various saints, coined by virtue of authority granted to certain abbots for that purpose, and the date of which cannot be accurately stated.

GREAT BRITAIN.

St. Peter, all of silver, size and form of pennies; struck at York.

St. Martin, only two specimens extant; pennies, struck at the city of Lincoln.

St Edmund, penny and half-penny, struck at St Edmundsbury about 950.

ARCHBISHOPS.—Bishops, abbots, and archbishops were, in early times, given permission to strike money, but the latter alone were allowed to stamp their own portraits on the coin. The right was withdrawn in 924, by Æthelstan, who ordered that all the money in the kingdom should be uniform; after that the ecclesiastical mintages were distinguished from the royal only by some peculiar marks, and even these were banished in the reign of Henry VIII. Mention is here confined to pieces struck by the Sees of Canterbury and York, prior to the restrictions imposed by Æthelstan. The earliest authentic coin originating at the mint of the Archbishop of Canterbury is a very rare penny of *Jaenbrht*, who held that See from 763 to 790, and on this he is united with the King of Mercia.

Æthelheard Abp., 790 to 803, contemporary with Offa and Coenwlf, kings of Mercia, and both their names occur on his coins, which are very rare.

Vulfred, 803 to 830, on his pennies dropped the king's name, placing his own and his portrait on the Obverse.

Theogild succeeded Vulfred, but held the See only three months and left no coins.

Ceolnoth, *Abp.*, 830 to 870, put his name, bust and titles on pennies, of which several exist.

Ethered, *Abp.*, 871 to 890; only one coin known, devices as preceding.

Plegmund, 891 to 923, left a few of his pennies with name and title, but no portrait.

The coins of the archbishops of York were stycas, until they were patterned after the regal coins, and then some symbol or mint-mark was the distinguishing feature.

Embald, 796, is the first of this See whose stycas are known, but he is probably the second of that name; there are many varieties.

Vigmund, 851, succeeded *Wulsius*, the immediate successor of Embald, who left no coins. Vigmund left several types.

Ulfhere, 854 to 892, the last Archbishop, whose name occurs on York mintage; his stycas, very rare, resemble the former ones.

MONARCHS OF ENGLAND.

Ecgbeorht, 800 to 837, became King of the West Saxons, called his territories England, and conquered nearly all of South Britain. His pennies are very rare.

Ethelwlf, 837 to 856, son of the above, succeeding only to the West Saxon dominions: Kent, Essex, Sussex and Surry, going to Æthelstan, on whose death, 852, they reverted to Ethelwlf. Fifty varieties of his pennies are known.

Æthelbald, 855 to 860, son of Ethelwlf, seized on West Saxony in 855 and held it until his death. Only one coin of his ever known.

Æthelbearht, 856 to 866, second son of Ethelwlf, succeeded to Kent, etc., on his father's death, and to West Saxony after his brother. Sixty varieties of his coin known.

Æthelred, 866 to 871, brother of the above. Coins not numerous, very light and of debased silver.

Ælfred, 872 to 901, brother of the above. Coins very rare, mostly pennies; but some pieces are in existence that are not of that class.

Budweard, 901 to 925, son of Ælfred. Coins: pennies, half-pence or thirds of pennies; about eighty varieties known.

Æthelstan, 925 to 941, succeeded his father, and regulated the mints in various towns; conferred upon some ecclesiastics the privilege of striking

GREAT BRITAIN.

money, but ordered it all to be of one (the regal) type. About sixty variations of mints and 110 of moneys occur upon his coins: all pennies, of good silver.

Eadmund, 941 to 946, brother of foregoing; and his coins all of like character. Over 100 types known.

Eadred, 946 to 955; types of coins (120 known) similar to those of his predecessors.

Eadwig, 955 to 959, son of Eadmund: 30 varieties. Types like the above.

Erdgar, 958 to 975, brother of Eadwig, during whose life he had been elected King of all the country between the Thames and the Firth of Forth; after his brother's death, 958, he became King of all Britain, being the first monarch to rule over all the really and permanently united Kingdom of the Heptarchy. Coins similar to the others, though generally lighter; 170 moneyers' names and over 70 mints mentioned on his varieties.

Eadweard II, "The Martyr," 975 to 978, eldest son of above, succeeding at the age of 13; murdered by command of his step-mother, Elfrida. Coins like his father's, with one exception, and numerous.

Ethelred II, 978 to 1016, succeeded his murdered half-brother; passed laws for regulation of coinage. His money presents some novelties of type and appearance, and is quite numerous, over 250 varieties being known.

Cnut, 1016, to 1035, Swayne, King of Denmark, had in 1013, gained possession of part of Britain, and *Ethelred* took refuge in Normandy. Cnut claimed the dominion of his father, Swayne, and fought hard against *Ethelred* and his son, *Edmond Ironsides* (who left no coins), and finally obtained rule over the whole kingdom. Of Swayne, no English coins are known; but the money of Cnut is very plentiful, 340 moneyers being mentioned and more places of mintage than any other king.

Harold I, 1035 to 1040, son of Cnut. His pennies are very light; 50 varieties known.

Harthacnut, 1040 to 1042, elected to succeed his brother. English and Danish coins appear in this reign; all very rare.

Edward "The Confessor", 1042 to 1066. Coins various in type, size and weight; half-pence and farthings were formed by cutting the penny into two or four parts. About 400 varieties.

Harold II, 1066, succeeded Edward and reigned only nine months; killed at the battle of Hastings. Coins numerous.

William the Conqueror, 1066 to 1087, and *William Rufus*, 1087 to 1100. The money of both these kings imitates that of their Saxon predecessors so closely that it is hard to distinguish to which one of them the pieces belong. Pennies alone were coined, and must have been struck in a collar, for they are uniformly round. Pieces plentiful.

Henry I, 1100 to 1135, regulated coinage and passed severe laws against counterfeiters and debasers. Pennies only known of types and forms very various.

Stephen, 1135 to 1154, usurped the throne after Henry's death, dissipated the treasury and debased the coin. Very few of his pieces are extant; all that are known are of good silver.

Henry, Bishop of Winchester, the legitimate brother of Stephen. One coin is known as struck by his authority.

Robert, Earl of Gloucester, illegitimate son of Henry. One type of coin known.

Stephen and Matilda: One type supposed to have been struck when Matilda, wife of Stephen, took command of the army and liberated her husband when he was a prisoner.

Eustace, elder son of Stephen and Governor of York. Two varieties very rare and very imperfect.

William, son of Stephen, has two coins ascribed to him, but it is doubtful if they are rightly assigned.

GREAT BRITAIN.

Henry II, 1154 to 1189, adopted a new money which was very poorly minted, irregular in size and shape and in parts illegible. In 1180 he sent for a foreign artist, Philip Aymary of Tows, to improve his coinage, and it became round and legible, but otherwise not much benefited. Coins numerous.

Richard I and John : No English money known.

Henry III, 1216 to 1272 : Pennies only known.

Edward I, 1272 to 1307, coined pennies, half-pence and farthings; and the original groat is by some assigned to this reign, and it is generally believed that he first caused that coin to be struck. Many varieties.

Edward II, 1307 to 1327 : Coinage of same weight, standard and type as that of his father, but some distinguishing mint marks; not very rare.

Edward III, 1327 to 1377, struck groats, half-groats, pennies, half-pence and farthings, very many varieties.

Richard II, 1377 to 1399 : same coins, types, etc., as his predecessor.

Henry IV, 1399 to 1413.

Henry V, 1413 to 1422.

Henry VI, 1422 to 1461. There is no certainty of the coins of any of these Henrys, so far as the date is concerned; the types are similar and the coinage almost identical.

Edward IV, 1461 to 1483 : Same as the Henrys.

Edward V, 1483, is said to have had coins struck, but none have been discovered.

Richard III, 1483 to 1485 : Similar to the Henrys and Edwards; but no farthings known.

Henry VII, 1485 to 1509 : Same as above; some variation in device, and many varieties.

Henry VIII, 1509 to 1547 : Five different classes of coinage, all varying in type, weight and fineness of metal. Plenty.

Edward VI, 1547 to 1553, tried to better the disgracefully debased money of his father without great success. He ordered testoons, or shillings, to be struck with equal parts of silver and alloy, and of the weight of eighty grains, and in 1551 commenced the circulation of crowns, half-crowns, shillings, six-pences and three-pences, and pennies. There are many varieties, with many variations of fineness.

Mary, 1553 to 1558, announced her intention of restoring the coinage of its original highest standard, but she made it lower than ever.

Elizabeth, 1558 to 1602, set seriously to work to restore the standard. In the second year of her reign she had struck pieces of three-half-pence and three-farthings, never coined before or since. In 1561 the mill and screw process was introduced by a Frenchman; and the pieces thus coined are known as milled money. Many varieties in this reign.

James I, 1603 to 1625 : On his accession the two Kingdoms of England and Scotland were united and a new coinage was ordered, of standard fineness, 11 oz., 2 dwt. of silver with 18 dwts. of alloy; weight, $7\frac{1}{2}$ gr. to the penny. Many varieties and types.

Charles I, 1625 to 1649, improved the appearance of his coins and kept up the standard. Very many varieties.

Commonwealth : Parliament seized the tower and mint in 1642, and struck money from the King's dies, coining none in their own name, until after the execution of Charles, their first pieces bearing date 1649. The standard was that of Elizabeth.

Charles II, upon his restoration, 1660, coined money like his father's, refusing to use the mill and screw and striking his pieces by the hammer, which was last employed for this purpose in his reign.

James II, 1685 to 1688, conducted his coinage upon the same principles as that of his brother, in denomination, size, weight and fineness.

William and Mary, 1688 to 1695, issued coinage identical with that of James II.

GREAT BRITAIN.

William III, 1695 to 1702, made no change in weight or fineness, but altered the type of his money.

Anne, 1702 to 1714, continued the standard of her predecessors.

George I, 1714 to 1727, made no change in denomination, size, weight or fineness.

George II, 1727 to 1760, same as preceding.

George III, 1760 to 1820, no change.

George IV, 1820 to 1830: A new coinage on the same principles.

Victoria, 1830 to , a new coinage on the high standard, as before, and varied according to necessity of providing special pieces for colonial possessions.

SERVIA,**Silver. XIX†.**

SERVIA, SILVER COINS, all 900 fine. No. 1. 2 Dinar, worth about 39 cents; No. 2. 1 Dinar; and No. 3 is a piece of 50 Paras, equal to about 10 cents or a $\frac{1}{2}$ Dinar.

SERVIA is a kingdom of Eastern Europe, bordering on Slavonia, Wallachia, Bulgaria, Bosnia and Hungary, from which last named country it is separated by the Danube. By the Berlin Treaty of 1878, its area was increased to 18,787 square miles; population (in 1883), 1,820,000. The country is mountainous, its valleys fertile, producing, when cultivated, good crops of corn and other cereals; said to be rich in minerals. The chief trade is with Austria and Turkey; principal exports; swine, cattle, prunes, grain, wine and timber, amounting (in 1882) to \$8,819,315. Revenue \$7,473,000. Public debt, November, 1884, about \$35,000,000, one-half of which was contracted for railroad. No official financial reports published. Capital, Belgrade.

GREECE, a maritime kingdom in the south-east of Europe, composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into thirteen provinces, called Nomarchies. Total area, 20,018; population (1879), 1,979,423. Vegetation is varied but agriculture is backward. Minerals: lead, magnesite and chromate of iron, which are all exported; also raw produce, currants, figs, fruits, tobacco, wine, olive oil, honey, wax, gum, silk, valonia, and sponges, amounting in 1881 to \$12,091,160. This country is under a paper money regime. In February, 1883, the premium on gold was 15 per cent., and even fractional money was scarce.

HAYTI. This Republic is the western or French portion of the Island of San Domingo, which next to Cuba, is the largest of the West India Islands. Total area, 28,000 square miles, of which about one-third belongs to Hayti; population, about 550,000. Tortuga, Gonave and other islands belong to Hayti. Revolutions have almost annihilated its commercial prosperity, and kept finances in chronic disorder. It is said to have mines of gold, silver, copper, tin and iron. Its principal exports: mahogany, logwood, honey, coffee and cocoa, amounting in 1881 to \$6,240,-400.

2.	Coins from 1 to 6, are the "Lump Money" of Java during the Hindoo Period, prior to Batavia's rule.	The name given to this money by the people who used it is unknown. There is none now in circulation, and those in existence have been found in graves and taken out of the earth.				The lump or square indentation with three lotus leaves, is found on all these lumps, oftentimes both marks. Weight, fineness and value cannot be given, as there is not the least uniformity. The Specimens command a high price, for collections.

ITALY, a kingdom in the south of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the Island of Elba, and about 66 minor islands. Total area, 111,405 square miles; total population, 28,459,028. The kingdom is divided for administrative purposes into 69 provinces; the small community of San Marino, enclosed within it alone, retained its independent form of government when, in 1870, the complete unity of the country under one crown was finally effected, and Rome once more made the capital of Italy. The country produces many and fine wines. Tuscany, Liguria and the Province of Bari furnish the finest olives and olive oil; the cultivation of silk is extensive; exquisite fruits abound, the supply of sea and fresh water fish is plentiful. Minerals: iron, galena, zinc, copper, manganese and antimony ores, sulphur, gypsum, amianthus, alum and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt, a government monopoly, is supplied from 11 salines, and deposits of native salt are common in the Apennines. Principal exports: olive oil, wine, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruits, prepared meats and fish, chemical products, woods, roots, etc., for dyeing and tanning, works of art, etc. Exports in 1883 amounted to \$239,732,259. Italy is a member of the Latin Union and her coins have a legal currency with those of France and the other nations comprising that Union. There are no late official reports of the finances.

MONACO, a paradise for pulmonary patients and gamblers, is a principality of Italy, between Nice and Ventimiglia, bordering on the Mediterranean and the French department of Alpes-Maritimes, consisting of the town of Monaco and a small adjoining territory, including the town of Monte Carlo. Total Area, about six square miles; population, 3,741. The climate is delightful. All taxes were abolished in 1889 by the reigning prince, and his entire revenue is derived from the rent of the Casino or gambling house, and a percentage on the games.

JAPAN, an ancient and extensive Empire, comprising over 3,800 small and large islands. Total area, 147,613 square miles; population (in 1882), 36,700,118. This country is said to possess a written history extending over 2,500 years, and its sovereigns have formed an unbroken dynasty since 600 B. C., the present emperor being the 123d of his race, but the authentic history begins about 400 A. D. The soil teems with every variety of agricultural produce; tobacco, tea, potatoes, rice, wheat and other cereals are all cultivated; coal exists; copper, iron and sulphur abound; gold and silver mining is prosecuted; the agate, cornelian and rock crystal are found. The camphor, paper-mulberry, vegetable wax and other valuable trees flourish. Chief exports: tea, silk, silkworms' eggs, cocoons, lacquer-ware, camphor and dried fish. Exports in 1883 amounted to \$37,235,775. In 1883, the export of gold and silver was 3,206,210 Yens (\$2,786,190.49); notes in circulation (in U. S. money value), Government, \$85,161,371; bank, \$27,249,722.

JAPAN.

Gold. XXIV. ,

The large cut on this plate is an exact drawing of the "Obang" of Japan, from a specimen now in the cabinet of the author. Strictly speaking these pieces can hardly be classified as coins for they are only issued as presents or rewards from the Imperial ruler, and on each one is marked, with India-ink, the autograph of the Emperor presenting it and its current value.

Published by

A. M. SMITH, Post Office Box 754,
PHILADELPHIA, PA., U. S. A.

The smaller illustration on this plate, exhibits the "Obang" reverse; it is reduced in size, but the marks thereon, which are the Imperial Coat of Arms, a flower and three leaves of the Kiri or Dryandra, are full measure with the original. The specimen from which this cut was made is: In weight, 1728 grains; fineness 700, contains of pure gold 1209 grains; value, of gold, \$52.04.

SIAM, an extensive kingdom of south-eastern Asia, situated in the heart of the peninsula between India and China, consisting of 41 provinces, each governed by a Phya, or great functionary. Its area is estimated at 300,000 square miles, and the population at about 5,700,000. There are several ports along its coast-lines; in the Gulf of Siam, but foreign commerce is carried on entirely at Bangkok, a few miles up the river Menam, Paknam being the customs station at its mouth. The chief products are rice, gums, teak, sandalwood, rosewood, and the aquila-tree, fruits and garden produce. Exports: oil-seeds, drugs, dye-woods, timber, rice, etc. The government is an absolute and hereditary monarchy, and there are two kings, the first is actual monarch; the second is nominal head of the army. The exports in 1881 (latest official report), were \$10,931,430. The latest official treasury report, dated June 20, 1883, says: "The finances of Siam are in an embarrassed condition, and no definite information thereon may be had except from Government, and Government, spink-like, maintains silence."

PORTUGAL, the most westerly kingdom of Europe and a part of the great Iberian Peninsula, with its insular appendages. The total area is 35,812 square miles; population (in 1881), 4,708,178. Chief products: wheat, barley, oats, maize, flax, hemp, rice, grapes, olives, oranges, lemons, citrons, figs and almonds. "Port" wine is shipped from Oporto. There are forests of oak, chestnut, sea-pine and cork woods. Minerals: manganese, antimony, lead, copper, iron, marble, slate, coal and salt. Manufactures: gloves, silk, woollen, linen and cotton fabrics, metal and earthenware goods, tobacco, cigars, etc. Exports: wine, fruits, oil, cork and salt, amounting (in 1882), to \$18,998,000. For many years the annual expenditure has been in excess of the revenue; the national and floating debt, now about \$500,000,000, is continually increasing. The "Bank of Portugal" acts as fiduciary agent of the treasury. The *Dependencies of Portugal* consist of the Cape Verde and Bissagos Islands, off the west coast of Africa, St. Thomas and Princes Islands in the Gulf of Guinea, and a large extent of both the east and west coasts of South Africa, constituting altogether an area of 697,365 square miles, with 2,410,000 inhabitants. In Asia, the settlements of Goa, Damaun, Din, etc., with area of 1,086 square miles; 408,000 inhabitants on the coast of India, Macao on the Chinese shore, near Hong-Kong, and part of the Island of Timur, in the East Indian Archipelago, cover a surface of 7,134 square miles, and contain a population of 877,500. The Island of Madeira on the north-west coast of Africa is much frequented by invalids.

RUSSIA, an Empire, said to comprise one-seventh of the territorial surface of the globe. In addition to Russia in Europe (exclusive of the Caucasus), embracing more than one-half of that continent, it comprehends one-third of Asia. *European Russia* consists of: 1. Russia Proper, 1,881,300 square miles; 75,604,788 population; 2. Poland, 49,158 square miles; 7,219,077 population; 3. Finland, 144,228 square miles; 2,028,021 population. *Asiatic Russia*: 1. Caucasus, 172,843 square miles; 2. Siberia, 4,826,480 square miles; 3. Central Asia (Turkestan, etc.), 1,251,384 square miles, with an aggregate of 15,186,456 inhabitants, making the entire country ruled over by the Emperor, 8,325,393 square miles, with 100,038,342 population. A great portion of this territory is unfit for cultivation, being either frozen barrens, rocks or sand. The country between the Baltic and Black Seas is eminently fertile, producing all the chief cereals; hemp, flax, potatoes and tobacco are also cultivated. The forests and wood lands of European Russia occupy 500,000,000 acres; oak, lime, maple and ash trees predominating. Mines in the Ural mountains yield gold, platinum, copper, iron, rock-salt, marble, and kaolin, or china-clay. Silver, gold and lead are mined largely in the Altai mountains. An apparently inexhaustible bed of coal exists in the basin of the Donetz, near Kharkoff. There are many large manufacturing establishments for weaving, tanning, fur-dressing, etc. Linen is extensively made by handlooms; woollen and worsted stuffs, fine cloths and mixed fabrics are also produced. The chief exports are grain, timber, hides and skins, raw and dressed, flax, hemp, tallow, wool, linseed and hemp seed. Exports (1882), \$460,150,000. Russia is very deeply in debt, but the precise amount is unknown; the interest bearing portion is about \$2,028,355,000. In the Budget for 1884, there is set down for interest on national debts, \$139,642,014. Since 1843, paper money has reigned supreme in Russia, and the premium on gold and silver for many years has driven the precious metals abroad. The "Imperial Bank" is the sole depository of metallic money, and the stock therein in coin and bars was in April, 1883, 206,000,000 roubles, mostly in gold.

SPAIN, a kingdom, situate on the south-west of Europe, and occupying the larger portion of the great Iberian Peninsula. It was formerly divided into 14 provinces (now subdivided into 49), called the Ancient Provinces, and these are still best known and most referred to, viz: New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary and Balearic Isles, comprising an area of 195,775 square miles, with a population of (in 1883), 16,902,621. To these must be added Cuba and Porto Rico. Area, 70,466 square miles; 2,056,010 population; the Philippine Islands in Asia and Oceanica, 53,299 square miles, 6,193,232 population; the African possessions in the Gulf of Guinea, Fernando Po, etc., 1,435 square miles, with 36,000 inhabitants, making a total of 320,975 square miles, and 24,914,000 population. Spain is rich in minerals, especially iron, copper and lead. The country is fertile and tropical fruits flourish; also wheat, barley, oats, maize, rice, hemp and flax of the best quality. The vine is cultivated in every province, and superior wines are produced. Exports: silk, quicksilver, iron ore and other metals, wines, olive oil, dry and green fruit, wool, grain, vegetables, cork, seeds and salt. Trade was for many years confined to France and Great Britain, but the United States and Germany are now competing for a share. Home trade is rigidly protected by high customs duties. The national debt has been consolidated, and is now \$1,290,000,000 at 4 per cent. There is no floating debt. The only paper currency is that of the "Bank of Spain." Exports in 1883 amounted to \$127,661,846. There are no gold mines in Spain, and all the bullion of this metal is obtained from abroad, and from the remelting of old Spanish money.

ORIENTAL NUMERALS AND CHARACTERS.

The opposite plate is given as a guide in distinguishing coins marked with Oriental Characters. These are generally in Arabic, with variations, being very rude in Java and Morocco, somewhat precise in Turkey, Egypt and Persia, in the latter country they are in the flowing *taleek* which is to the strict Arabic, what our Italics are to the Roman. The dash resembling a 2 with elongated base, found on nearly all these coins means *in* or *at*, and the characters beneath gives the name of the city whereat the coin was struck. On the plate the figures 1, 6 and 10 in the column, represent Constantinople and distinguish the coin as of Turkey; figure 2, means Cairo, and is on the pieces of Egypt; figure 3 is Tunis; figures 4 and 5, Tripoli; 7, 8 and 9, Algiers, and No. 11 is Morocco. That there should be variations in the inscriptions is not strange as the coins are all engraved and those who do this work use the freedom which would be taken by penmen in writing the same name.

The numerals here shown were written according to European order (from left to right, but figures, letters and words in Arabic run in the opposite direction. Most Ottoman coins bear two dates, that of the Hegira and of the Sultan's reign. The year of the Hegira in which the ruler ascended the throne is on each coin of Turkey and upon another portion the year of his reign will be found; the two added gives the date of the coin according to the year of the Hegira and this be readily transformed to the Christian date.

The "Hegira" or flight of Mohammed from Mecca was on July 16th, A. D. 622, and from that date time is recorded by his followers:

Mahmond I., A. H. 1143., A. D. 1730.

Othman III., A. H. 1168., A. D. 1754.

Mustapha III., A. H. 1171., A. D. 1757.

As the Mohammedan year is lunar, it is shorter than ours by about eleven days, and they thus have thirty-four years in the time we have but thirty-three.

Morocco dates its coins by the Oriental rule, but uses the European figures. Hindostan, Java and Persia use the Arabic or Persian characters, but they do not bear the peculiar marks of the Turkish coins. The date is frequently omitted in coins of Persia, and when engraved is in very minute figures. The money of Hindostan, except in a few instances is issued by the British East India Company from the mints at Madras, Calcutta and Bombay, the Madras coins are stamped from Arcot, Calcutta's bear the name of Morshedabad, a neighboring city and Surat is on those of Bombay; some of these are with, some without dates, the figures, even when on, are not reliable; Java's coins (Dutch East India Co.) prior to the restoration in 1816 were marked with Arabic characters, but had the Christian date in European figures.

The GOLD AND SILVER COINS exhibited upon the plates devoted to Afghanistan are described as fully as possible, and are copied from specimens in the hands of collectors and museums. The dates range from the subjugation of Bactria by Alexander the Great, to after the Mohammedan invasion of India; or from about B. C. 200 to A. D. 1200, and are relics of the Greek and Indo-Parthian Dynasties, the Barbaric, Indo-Scythian, and Sassanian Kings, Prince-Ghizni, with other Mohammedan, Hindu, Rajput and Buddhist coins. They have been gathered from many sections and are most precious in the eyes of collectors, the great variety in character is owing to the frequent changes of rulers through conquest and reconquest. Weight, fineness and value, it is impossible to state, as being, most of them, extremely rare, they command very high premium prices.

AFGHANISTAN is a country on the north-west frontier of India, bounded, W. and S. by Persia and Baluchistan, N. and E. by lines in dispute between Russia and other powers. The mineral wealth is reputed great, but few mines are worked. Foreign money is the only present circulation. The exports into India, in 1883, were worth \$1,550,000, Population, estimated at 4,000,000.

TRIPOLI, a Vilayet, or Province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the Barbary States, comprising also the countries of Fezzan and Barca. Its area is estimated at 844,400 square miles, and population 1,200,000. The revenue is raised chiefly by tax or tribute. Exports: bullocks, ivory, wheat, oil, barley, ostrich feathers, madder, pepper, wool and esparto grass. *Bengazi*, the chief town of the Sandjak, is now a separate Vilayet; it was the second city of importance in Tripoli and has about 22,000 inhabitants. The commerce in cereals, wool and other agricultural produce is considerable, the export trade with Great Britain in 1882, amounting to \$1,500,000. Tripoli and Tunis have no connection with each other.

ALGIERS is the capital of ALGERIA, a French Colony in Africa; bounded, N. by the Mediterranean Sea, E. by Tunis, S. by the Great Sahara, and W. by Morocco. Area, 257,533 miles; population, 3,310,412, about one-tenth being Europeans, of whom one-half are French. Formerly a Turkish regency; coins somewhat similar, but entirely distinct from that country, were used. These are only seen as curiosities, the colony being supplied with a coinage from France, and the latest official report (1883) of such circulation was: In gold coin, 50,000,000 Francs; in 5-franc pieces, 35,000,000 Francs; in fractional coin, 18,000,000 Francs. The Bank of Algeria can alone issue notes, which are legal currency in the colony; the bills are of 20, 50, 100, 500 and 1,000 Francs, and the circulation in 1883 amounted to 60,000,000, against a reserve 24,000,000 Francs. The country has no mint, and no mines of silver or gold. Italian, Swiss, Belgian and Spanish silver money circulates and is received at par.

EGYPT, a country in the north-east of Africa, nominally a province of the Ottoman Empire, independent and under the rule of the Khedive by Firmans of the Sultan, and at the same time entirely dependent for its existence as a sovereign state upon the will of stronger powers, England being dominant. Egypt extends up the valley of the Nile so far as the Equator, embracing Nubia, Kordofan, Darfur, etc. It is divided into Upper, Middle and Lower Egypt, which last includes the Delta. Area, 212,600 square miles; population, 5,517,000 in 1877. Agricultural products: millet, maize, wheat, rice, melons, cotton, gourds, sugar, tobacco, hemp, cotton, etc. No metals, but salt, nitre, marble, red granite, Oriental alabaster, and limestone are found. The exports are grain, beans, cotton, sugar, skins and feathers, amounting in 1881 to \$68,423,150. There is a mint at Cairo, but no statistics are published. The coin most in use is the English sovereign, of which, in 1883, there was in circulation the value of \$29,199,000, with probably the same amount in National coin, and half as much silver; the latter is generally the Maria Theresa thaler, coined in Vienna, though these pieces circulate rather in Soudan, Abyssinia and Arabia, than in Egypt. The country has been almost hopelessly involved for years.

MOROCCO, in the north-west of Africa, largest of the Barbary States. The Empire is an absolute monarchy, consisting of the kingdom of Fez and Morocco, and the territories of Suse, Draha and Tafilet, which are again subdivided into 33 districts. Total area, 260,000 square miles; population 6,140,000. Agriculture is greatly neglected. The principal products are: wheat, barley and maize, oil, esparto-grass and hemp, figs, almonds, lemons, olives, pomegranates, oranges and dates. The mineral treasures are said to be rich; gold, silver, antimony, iron, coal, copper, lead and tin are all found, the last three in considerable quantities. Wool is plentiful and all these are exported, with hides, carpets, slippers, gums, ostrich feathers, etc., mostly to Great Britain, which in 1883 received exports amounting to \$1,375,270. The government refuse any account of finances. There is no National Bank or paper currency. Spanish and French coins circulate with a very few Moorish, the latter of silver only.

PERSIA, called by the natives, Iran, is the most powerful, opulent, and extensive native kingdom of Western Asia. Area, 636,368 square miles; population 7,653,600. Its immense valleys abound with rarest and most valuable vegetation; wheat, barley and other cereals, cotton, sugar, rice and opium; the vine flourishes and wines of Shiraz are celebrated. Silk is an important production, and the mulberry tree is largely cultivated. Salt, iron, coal, copper, lead, antimony, sulphur, turquoises and other precious stones are found. The Persians excel in their dyes, brocades and embroidery; arms, carpets, shawls, felts, cotton and woollen fabrics are all manufactured and exported to the amount (in 1882), of \$2,500,000. There is no National debt, the revenue always exceeds expenditure, and the royal treasury is reputed to contain millions in gold and other treasure. There is no paper currency, and all the coinage is now made at the royal mint, after the modern system with uniform dies. Formerly every city had the right to issue money, and scores of coins of the same denominations, but bearing the names of different cities, were in general circulation. The governors of provinces and cities pay large sums for their offices and are required to furnish a specified revenue to the king, they taxing the people at their pleasure and making enormous profits.

TURKEY (the Ottoman Empire). Turkey in *Europe*, once very extensive, is now reduced to about 130,571 square miles; population 8,971,000 (this including Bulgaria, Eastern Roumelia and Bosnia, without which the area is 80,000 square miles, and population 5,275,000). The soil is fertile, though but little cultivated; the agricultural products are maize, rice, cotton, rye, barley, millet; of trees, there are the pine, beech, oak, lime and ash, with the apple, pear, cherry and apricot in the basin of the Danube, the palm, myrtle, maple, sycamore, walnut, chestnut, carob, box, laurel, etc., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum and fruit trees in Albania, and abundance of roses in the valley of Maritza. Minerals: iron, lead blended with silver, copper, salt, alum and coal. Manufactures: woollen and cotton stuffs, shawls, leather, fire-arms, dyeing and printing works.

Turkey in Asia, largest of the two divisions, comprises Asia Minor, Syria, including Palestine, the greater part of Armenia and Kurdistan, Mesopotamia (the valley of the Euphrates and Tigris), and the western portion of Arabia, bordering the Red Sea, with the district of El Hasa on the eastern side of the Persian Gulf. Total area, 729,981 square miles; estimated population 17,536,465. The latest official reports of commerce and finances in Turkey, are as follows: (1884), Public debt, \$588,186,170; the government by an arrangement with its bondholders, "scaled" its public debt in 1881 from \$1,264,009,425 to the amount first given: revenue, \$68,430,000; expenditures, \$70,495,000; imports, \$107,272,845; exports, \$98,272,475. In 1883 there was coined in the Turkish mint, of gold, 30,560,000 piasters (\$1,844,040); of silver, 1,000,000 piasters (\$44,000); at the close of the year there was no gold in the treasury. Of government paper currency there was outstanding on December 31, 1883, 160,247,186 piasters (\$7,050,876.18); the government paper is no longer in circulation. At the same date, the Imperial Ottoman Bank (the notes being redeemable at par in gold), had outstanding in 500 piaster notes, 81,025,000 piasters, equivalent to \$1,365,100. Turkish finances are and have long been much confused.

SWEDEN AND NORWAY. These two kingdoms, now united under one sovereign, embrace between them the entire north-western peninsula of Europe, usually called Scandinavia, bounded by the Baltic Sea and Gulf of Bothnia on the west, and the Atlantic Ocean on the east.

Sweden comprises the eastern half of the peninsula, and, except the capital is divided into 24 governments, "Län," with an area of 170,980 square miles, and a population (Dec. 1881), of 4,572,245, of whom 8 millions were devoted to agriculture, 260,000 being owners of the land they cultivated. Most of the cereals are raised, and potatoes; oats are largely exported. Mineral products are very rich; iron which makes the finest steel; some gold and silver, copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry and marble; also coal. The chief exports are timber, oats, cattle, butter, iron, copper, steel, paper, matches, zinc, ores, pitch, tar, etc., amounting in 1882 to \$62,140,040. Revenue and expenditures about even.

NORWAY and SWEDEN. Gold. XXV. 1

Norway, conjoint with Sweden since 1814, occupies the western and northern part of the peninsula. It is divided into 20 provinces, or "amts," comprising an area of 122,869 square miles; population 1,818,853; one-thirtieth of the country is cultivated, forests cover one-fourth, the rest is naked, uninhabitable, mountain-land. The cod and herring fisheries employ most of the inhabitants. Mineral products are similar to, but less than those of Sweden. Ship building and timber dressing are the chief industrial arts. Exports: timber, cod fish and its oil, herrings, salmon, lobsters, minerals, furs and ice, amounting in 1883 to \$34,154,415; public debt same year, \$28,791,240, incurred mostly in constructing railways. The administration of Norway is entirely distinct from that of Sweden, and it retains its own laws.

SWITZERLAND, a Federal Republic of Central Europe (the Helvetia of the Romans). It is composed of 22 Cantons, of very unequal size, united under a constitution dated May 29, 1874, and comprises a total area of 15,991 square miles, with 2,846,012 population in 1880. Forests cover one-sixth of the whole surface; in the valleys, wheat, oats, maize, barley, flax, hemp and tobacco are produced. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, etc., clocks and watches have long been the staple produce of Geneva and Neuchâtel, while leather, gloves, porcelain, pottery, tobacco, snuff, cheese, sugar, etc., are made, and all these are exported. The debt in 1883, was \$6,120,780. The commerce of this country is not officially reported in money values. The Swiss Confederation has no paper money in circulation. The amount of such money in circulation at the close of 1883, as issued by the banks authorized by law to do so, was 117,551,000 francs. \$22,687,343.

Silver. XXXIX.

CAMBODIA,

Silver. XXVIII.

CAMBODIA, SILVER COINS.—No 1; 3 Ticals, worth about \$1.80. No. 2; Coin equal to 5 Francs, 900 fine, 395 grains weight—72 cents. No. 3; Equal to 4 Francs, 900 fine, 154 grains weight—28 cents.

CAMBODIA, or CAMBOJA, or CAMBODGE, is bounded N. by Siam, E. by Cochin Chia, S. by the French Colony, and has a sea board of 200 miles on the Gulf of Siam. The French assumed a protectorate over it in 1864. It is the remains of a once powerful and wealthy nation. The Capital is Penmpueh, and Kampot is its only port. Chief products and exports; gamboge, cardamom, caoutchouc, spices and fish. Elephants and rhinoceroses abound, and the magnificent remains of ancient glory are of greatest interest. Annual statistics are to be obtained.

Old Time yields up his precious hoards,
 Calm Sciences gives her just awards;

By tarnished coin, th' long-hidden past, restored,
 Proves History's truth,—completes her grand record.

ANCIENT GREEK COINS.

The rather numerous plates devoted to Greek coins of past ages are by no means the least valuable or interesting in this work, comprising as they do, records and studies in mythology through the presentation of the gods and heroes as imagined by their worshippers; in history presenting what must be accepted as authentic portraits of sovereigns and princes from Alexander to Augustus, covering a period of from B. C. 700, to the Christian Era, and giving reliable evidences of political changes and histories of the many autonomous cities and states of the then civilized world; the metrologist will find much to command attention in comparison of the various systems and standards; the paleographer will have examples of the ancient alphabets, Lycian and Cyprian, Phœnician, Greek, Latin, Iberian, &c., in different stages of development, and the artist or medallist see before him models of perfection, that for elegance of design and excellence of finish defy the genius and skill of the present day to equal or even approach.

The plates present specimen coins of Syria, Egypt, Asia Minor, Phœnicia, Northern and Central Greece, the Peloponnesus and islands of the Ægean, Italy, Sicily, Western Europe, the southern shores of the Mediterranean, &c., &c., exhibiting the Period of Archaic Art, ending with the Persian wars, B. C. 700-480; Period of Transitional and Early Fine Art, to the end of the Athenian supremacy, B. C. 480-400; Period of Finest Art, Age of the Spartan and Theban supremacies, B. C. 400-336; Period of Later Fine Art, Age of Alexander and the Diadochi, B. C. 336-280; Period of the Decline of Art, Age of the Epigoni, &c., B. C. 280-190; Period of continued Decline of Art, Age of the Attalids, B. C. 190-100; and Period of the late Decline of Art, Age of Mithradates the Great and of Roman dominion, B. C. 100-1.

The skill of the most eminent artists and engravers has been called into requisition in the preparation of these beautiful plates from authentic, original coins, and the results of their efforts, superior though it is, hardly does justice to the elegant models from which they copied.

1. A Phœacian stater, electrum metal, of *Lesbos*. Obverse, a lion's head; Reverse, an incuse square. Probably belonging to the period immediately preceding the reform of the coinage by Cræsus, B. C. 600.

2. A "LAMPSACENE stater," such as is mentioned in Attic inscriptions, together with the staters of Cyzicus. This is of electrum; about the end of the fifth century a gold coinage was introduced. The sea-horse is a symbol of Poseidon. About B. C. 478.

3. Early gold coin, an Euboic stater of *Sardis*, capital of Lydia. Obverse, foreparts of lion and bull, face to face; Reverse, incuse square. B. C. 568.

4. A double stater of *Cyzicus*, Lion with fish below, on obverse; Reverse, punch-mark, about B. C. 470.

5. A gold Daric, or Persian stater, of Darius Hystaspes, who died B. C. 404. Obverse, the King kneeling with bow and javelin; Reverse, the punch mark.

6. COLOPHON, a coin of a dog standing upon a fish. Pliny states that the people of this city trained their dogs to assist in war, and to do duty as sentinels; Date about B. C. 500.

7. DOUBLE STATER of Phœcea, an Ionian city in Asia Minor. A seal on the Obverse, and mark of punch on the Reverse. Date about B. C. 500.

8. DIDRACHM of Ægina, an island in the Saronic gulf. Obverse, a land tortoise; Reverse, the punch-mark divided into compartments. Date B. C. 750.

9. TEOS, a gold coin of head of the fabulous griffin on Obverse, and punch-mark of very early date on Reverse. Date B. C. 520.

10. An incuse coin of the city of Sybaris, destroyed B. C. 510. A bull is shown, looking backwards. The initial letters, read from right to left, the first letter turned partly over, indicating great antiquity.

ANCIENT GREEK COINS.

ANCIENT GREEK COINS.

11. Of the Spartan colony of Cyrene in Africa. Obverse, the sacred Silphium plant; Reverse, in punch mark, head of Jupiter Ammon. Date B. C. 450-420.

12. Of Athens, probably in the time of Pericles. Obverse, head of Athena (Minerva); Reverse, punch mark with owl and the initials of the city.

13. Early coin of Syracuse in Sicily. Obverse, head of Jupiter, with thunderbolt behind the shoulder.

14. Very early coin of Selinus, a town on the south coast of Sicily. Obverse, leaf of wild parsley, the sacred symbol of the city.

15. TETRADRACHM, of Panormus. Obverse, Head of Demeter, the products of the field in her hair; Reverse, a horse galloping past a palm tree. Date, B. C. 480.

16. Bronze coin of Panormus. Obverse, Head of Janus, laureated; Reverse; Po, enclosed in a wreath of olive leaves. B. C. 480.

17. Bronze coin of Panormus. Obverse, a helmeted male head, laureated; name of the city around it; Reverse, a laureated male head. B. C. 480.

18. Bronze coin of Panormus. Obverse, a fine head of Pallas; Reverse, a horse head and the trinacrin, typifying the three-cornered island of Sicily. B. C. 480.

19. Bronze coin of Mamertini. Obverse, Head of Hercules in a lion's skin; Reverse, an eagle standing on a support and having a serpent trodden under his left claw. Date, about B. C. 400.

20. TETRADRACHM, of Panormus, a city in Sicily. Obverse, Head of Hercules with lion's skin; Reverse, a horse head between a head of wheat and a palm branch. Date, B. C. 480.

21. Bronze coin of Panormus. Obverse, a male head; Reverse, three spears of wheat, indicating the fertility of the country. B. C. 480.

22. TETRADRACHM, of Zancle, now Messina, of Sicily. Obverse, a dolphin curved; Reverse, fancifully subdivided by two series of parallel lines, at right angles to each other: In the central space is a shell. Date, about B. C. 400.

23. TETRADRACHM, of Messina. Obverse, a hare, courant; Reverse, a car drawn by mules, with victory, holding crown, flying above. These peculiar types were first adopted on coins by Anaxilaus, who won a victory at Olympia with the mule car, and who introduced hares into Sicily. About B. C. 400.

24. A bronze coin of Mamertini. Obverse, a male head, laureated; Reverse, a bull, with lowered head, advancing towards the observer's left. Date, about B. C. 400.

25. TETRADRACHM, of Messenia, a south-westerly district of Peloponnesus. Obverse, a lion's scalp; Reverse, head of a calf, looking toward the observer's left. B. C. 450.

26. TETRADRACHM, of Catana, a city of Sicily. Obverse, a male head, laureated, full-face fronting; Reverse, a quadriga passing a column, a victory flying above, a serpent beneath. B. C. 400.

27. TETRADRACHM, of Catana. Obverse, fine head of Apollo, laureated, etc.; Reverse, a quadriga, with a victory above and a crab beneath. B. C. 400.

28. An electrum coin of the city of Syracuse, the most important in Sicily. Obverse, an elegant head of Artemis; Reverse, a fine head of Apollo. B. C. 500.

29. TETRADRACHM, of Syracuse. Obverse, head of Arethusa, surrounded by dolphins; Reverse, a quadriga, with victory above, holding a legend; below are two dolphins. B. C. 500.

30. Bronze coin of Syracuse. Obverse, a fine head of Apollo; Reverse, a biga driven towards the observer's right; the Greek letter Psi in the exergue. B. C. 500.

ANCIENT GREEK COINS.

HISTORICAL COIN ATLAS OF THE ROMAN EMPIRE.

Pieces of all Emperors, Empresses, Tyrants and Kings,

FROM JULIUS CÆSAR B. C. 70, TO THE EXTINCTION OF THE WESTERN
EMPIRE, A. D. 476.

1. **Cæsar, Caius Julius**, born B. C. 100. Made Perpetual Dictator B. C. 44. Murdered by Pompey and Senators, March 15th of same year. One of the most noted characters in history, distinguished by extraordinary genius and attainments in the most diversified pursuits.

2. **Augustus, Caius Octavius Cæpeas**, first Emperor of the Roman Empire. Born B. C. 63. Declared Emperor B. C. 29. Died A. D. 14. Coins represent him with Julius Cæsar, Lepidus, Agrippa, Tiberius, Julia, Caius and Julius and Germanicus. A wise and moderate ruler.

3. **Tiberius, Claudius Nero Cæsar**, born B. C. 42. Son-in-law of Augustus Cæsar A. D. 4. Emperor A. D. 14. Smothered by order of Caligula A. D. 37. His reign exhibits every variety of detestable actions.

4. **Drusus, Nero Claudius**, afterwards **Germanicus**, born B. C. 15. Cæsar A. D. 4. Poisoned A. D. 19. A noble prince, a grand general, a good and brilliant man.

5. **Antonia**, born B. C. 38. Wife of Drusus Senior. Poisoned by her grandson Caligula A. D. 37. Beautiful, virtuous and unfortunate. High honors were paid to her memory.

6. **Drusus Cæsar**, or **Junior**, son of Tiberius. Born B. C. 13. Poisoned by his wife A. D. 32. Consul A. D. 15 and 21. Tribunica Potestas A. D. 22. Naturally noble but degraded by gross passions,

7. **Germanicus Cæsar**, son of Nero Claudius Drusus. Born B. C. 15. Cæsar A. D. 4. Poisoned A. D. 19. A great soldier, a chaste, temperate and much beloved man and Consul.

8. **Agrippina**, wife of Germanicus Cæsar. Born B. C. 15. Starved to death in banishment by Tiberius A. D. 33. A noble woman.

9. **Caius**, or **Caligula**, son of Germanicus and Agrippina. Born A. D. 12. Emperor A. D. 37. Killed A. D. 41. A beast in human form.

10. **Claudius I, Drusus Nero Germanicus**, born B. C. 10. Emperor A. D. 41. Poisoned A. D. 54. Industrious and diligent, but a failure through want of judgment and tact.

11. **Nero**, originally **L. Domitius Ahenobarbus**. Born A. D. 37. Younger son of Cnæus Domitius Ahenobarbus and Agrippina. His mother afterwards married her uncle, Emperor Claudius, who adopted Nero and changed his name to Claudius Cæsar Drusus Germanicus. Emperor A. D. 54. Killed himself A. D. 68. A monster, probably the vilest character in history.

12. **Galba Ser. Sulpicus**, born B. C. 3. Emperor A. D. 68. Killed by his soldiers A. D. 69. A man of excellent qualities, but over severe and avaricious.

HISTORICAL COIN ATLAS OF THE ROMAN EMPIRE.

Pieces of all Emperors, Empresses, Tyrants and Kings.

ANCIENT ROMAN COINS.

13. **Otho. M. Salvius**, born A. D. 32. Emperor A. D. 69. Being conquered by Vitellius, he killed himself the same year. A companion of Nero, he imitated all the vices of that tyrant.

14. **Vitellius. Aulus**, born A. D. 15. Emperor A. D. 69. Killed by Vespasianus' soldiers the same year. He had a little learning, but great talent for eating, drinking, debts and debaucheries.

15. **Vespasianus. T. Flavius Sabinus**, bore A. D. 9. Emperor 69. Died 79. By birth of mean condition, he rose by merit as a soldier and statesman. He was frugal, temperate and amiable, but too avaricious.

16. **Domitilla, Flavia**, the first wife of Vespasianus. She died before her husband became Emperor, and the coins bearing her portrait were struck after her death.

17. **Titus, Flavius Sabinus Vespasianus**, born A. D. 40, son of Emperor Vespasianus and Domitilla Flavia. Emperor A. D. 79. Died A. D. 81. A brave general, a man of learning and a ruler of peculiar excellence.

18. **Julia**, daughter of Titus. Little record and that not good.

19. **Domitianus. T. Flavius Domitianus Augustus**, born A. D. 52. Emperor A. D. 81. Assassinated A. D. 96. One of the most cruel tyrants that ever disgraced a throne.

20. **Domitia Longina**, the wife of Domitianus, whose record as a woman equals her worthless husband's, whose assassins she urged on to their murderous work.

21. **Nerva. M. Cocceius**, born A. D. 32. Emperor A. D. 96. Died A. D. 98. A noble character of strong will and great administrative power. He received the honor of deification.

22. **Trajanus. M. Ulpius**, born A. D. 52. Cæsar and Emperor with Nerva A. D. 97. Sole Emperor A. D. 98. Died A. D. 117. One of the most distinguished of Roman rulers.

23. **Plotina, Pompeia**, died A. D. 129. Wife of Trajan. A woman justly honored for her extraordinary merits and high character.

24. **Marciana**, died A. D. 115. Sister of Trajan. Remarkable for her virtues and talents. After her death she was enrolled among the gods.

25. **Matidia**, daughter of Marciana. Honored in her life-time, deified after her death, which occurred in the reign of Antonius.

26. **Hadrianus. P. Aelius**, born A. D. 76. Adopted by Trajan and his son-in-law. Trajan adopted him A. D. 117 and he was declared Emperor the same year. Died A. D. 138. A good ruler and successful soldier whose virtues overbalanced many defects in his character.

27. **Sabina**, wife of Hadrian, honored in life and death, but unhappy in her matrimonial relations. She committed suicide about A. D. 137.

28. **Ælius**, adopted by Hadrian about A. D. 136, with the name of Cæsar. Died A. D. 138.

29. **Antonius, Pius**, in early life Titus Aurelius Fulvus Boionius Arrius Antonius. Born A. D. 86. Adopted by Hadrian and declared Emperor, A. D. 138. Died A. D. 161. A most exalted and wise character in private and public life.

ANCIENT ROMAN COINS.

ANCIENT ROMAN COINS.

30. **Faustina, Senior, Annia Galeria.** Born A. D. 105. Died A. D. 141. She was in every way unworthy of her great husband, but notwithstanding the utter profligacy of her life, he loaded her with honors before and after her death.

31. **Marcus Aurelius Antoninus,** Born A. D. 121. Adopted by and son-in-law of Antonius Pius, Emperor A. D. 161. Died A. D. 180. A wise, learned and just man. Commonly distinguished as "the Philosopher."

32. **Faustina, Junior, Annia,** daughter of Faustina, Senior, and as thoroughly abandoned to ill deeds as was her mother. She was married A. D. 145 or 146 to Marcus Aurelius, who either through good nature or blindness, ignored her vile acts, cherished her living and honored her after death in 175.

33. **Verus, Lucius Aurelius,** Born A. D. 130. Son of Ælius Cæsar, son-in-law of Marcus Aurelius and associated with him in the empire A. D. 161—169. His original name was L. Ceionius Commodus. Died by poison, A. D. 169. During his life he shared the honors worthily of Marcus Aurelius.

34. **Commodus, L. Aurelius.** Born A. D. 161, son of Marcus Aurelius and Faustina, Jr. Named Cæsar A. D. 166. Associated in empire A. D. 176. Named Augustus 177, sole emperor 180. Died from strangulation and poison 192. A miserable man and ruler, cruel, corrupt and dissolute.

35. **Crispina,** wife of Commodus, unfaithful, divorced, banished to Capreae and put to death.

36. **Pertinax, Helvius.** Born A. D. 126, Emperor A. D. 193. Assassinated after a reign of 87 days in consequence of his firmness in insisting upon reforms in the army and State.

37. **Julianus, M. Didius Salvius,** afterwards M. Didius Commodus Severus Julianus. Born A. D. 133. Declared Emperor A. D. 198. Assassinated after reigning 66 days. A good soldier, but unscrupulous and ambitious. He bought the supreme power by promises of money to the soldiers.

38. **Clara, Didia,** daughter of Julianus. Born A. D. 153; only known through her effigy, or rare occasional coins.

39. **Niger, C. Pescennius.** Declared Emperor by the army in Syria, A. D. 193. A good soldier, no statesman, he could not secure the power; was put to death as a rebel A. D. 194.

40. **Severus, L. Septimus.** Born A. D. 146, Emperor 193. Master of the whole Empire 197; died 211. An admirable general and reformer, but cold and ungenerous.

41. **Domna, Julia,** wife of Septimus Severus. A woman of powerful intellect and vast ambition. Starved herself to death A. D. 217, upon loss of power.

42. **Albinus, Clodius,** or Decimus Clodius Ceionius Septimus. Born in Africa; named Cæsar by Septimus Severus A. D. 193, rebelled and took title of Emperor of Britain and Gaul 196; defeated and killed by Septimus Severus 197. A great general and man of some learning.

ANCIENT ROMAN COINS

ANCIENT ROMAN COINS.

43. **Caracalla** or **Caracallus**, also Bassianus, and when adopted by Severus, called *M. Aurelius Antoninus* which last name he retained ever after. Born A. D. 188. Named Cæsar 196; Augustus 198; Emperor with his brother Geta 211; sole Emperor 212. Assassinated 217. A bold, bad man whose life is stained with all crimes.

44. **Plautilla, Fulvia**. Married to Caracalla A. D. 202; soon banished, left destitute and finally murdered by order of her husband.

45. **Geta, L or P. Septimus**. Born A. D. 189. Brother of Caracalla. Named Cæsar 198; Augustus 209. Emperor with Caracalla 211 and assassinated by him, while in the arms of his mother, A. D. 212. A far better character than his murderer though with many vices,

46. **Macrinus M. Opelius (or Opilius) Macrinus**. Born A. D. 164. Proclaimed Emperor 218. Killed 219. A haughty, blood-thirsty, inhumanly cruel coward. He was the instigator of the murder of Caracalla.

47. **Diadumenianus** or **Diadumenus M. Opelius**, son of Macrinus. Born A. D. 208. Named Cæsar and Augustus 217. Killed 218. Celebrated for his remarkable beauty.

48. **Elagabalus**, originally called Varius Avitus Bassianus, and afterwards **Marcus Aurelius Antonius**, Born A. D. 205; declared Emperor 218. Killed 222. A glutton and all that was bestial, his name has passed into a proverb.

49. **Paula, Julia Cornelia**. Married to Elagabalus A. D. 219, divorced the next year. Died in private life.

50. **Maesa, Julia**, grandmother of Elagabalus and Alexander Severus. One of the most able and strong minded women of history; ambitious and unscrupulous but wise and polite.

51. **Julia Scaemias**, mother of Elagabalus. Killed A. D. 222. She was the first woman who took a place in the Roman Senate. Her life was not pure and her body was subjected to every indignity after death.

52. **Mamaea, Julia**, mother of Alexander Severus. A woman of strong character, devoted to her son. Her advice caused the revolt in the army, A. D. 235, in which both mother and son were killed.

53. **Severus, M. Aurelius Alexander**, usually called Alexander Severus. Born A. D. 205. Killed 235. A brave soldier, a pure, just man, but too much under control of his mother.

54. **Orbiana, Sallustia Barbia**, one of the three wives of Alexander Severus. Known only through effigies on coins.

55. **Maximinus I, C. Julius Verus**. Born A. D. 173, of low parentage. Of immense strength and gigantic stature, (over 8 feet). He became conspicuous in the army and rose to be Emperor A. D. 235. He was assassinated with his son, 238. A brute in every respect.

56. **Maximus Caesar, C. Julius Verus**, son of Maximinus, shared in a lesser degree, the honors gained by his father, and was murdered with him A. D. 238. A promising young man.

57. **Gordianus I, M Antonius**, surnamed **Africanus**. Born A. D. 158. Proclaimed Emperor in Africa 238, and was acknowledged by the Senate, but unable to quell a revolt, he killed himself after a reign of about forty days.

ANCIENT ROMAN COINS.

ANCIENT ROMAN COINS.

58. **Gordianus Africanus II**, eldest son of G. A. I. Born A. D. 192. Associated with his father in the purple and perished in battle against the rebels on the same day. Both father and son bear noble characters in history.

59. **Pupienus Maximus, Marcus Clodius**. Born A. D. 164. Made Emperor with Balbinus 238. Killed three months after.

60. **Balbinus, Decimus Carlius**. Born A. D. 178. Associate Emperor with Pupienus. 238. An excellent combination of an able general and sagacious statesman. He and his brother ruler perished by assassination three months after their elevation to supreme power.

61. **Gordianus III, M. Antonius**, grandson of G. A. I. Born A. D. 222. Proclaimed Augustus 238. Assassinated 244. An amiable young man, deservedly well beloved.

62. **Tranquillina, Sabnia**, or **Sabnia, Furia**, wife of Gordianus III and daughter of Mithreus. No record.

63. **Philippus I, M. Julius**. Born A. D. 204. Emperor 244. Killed 249. A successful warrior and ruler. By some authors, claimed to have been a Christian.

64. **Otacilia Severa, Marcia**, wife of Philippus I. Believed by many ancient writers to have been a Christian.

65. **Philippus II, M. Julius**. Born A. D. 237. Cæsar 244. Associated with his father as Augustus, 247, and killed with him when but twelve years of age.

67. **Decius, C. Messius Quintus Trajanus Decius**. Born A. D. 201. Emperor 249; drowned in a bog, 251. He accepted the purple from the army under threats of death if he refused.

67. **Etruscilla, Herennia**, wife of Decius. Known only from her coins.

68. **Etruscus, Herennius**, son of Decius. Named Cæsar A. D. 249. Augustus 251. Killed in battle the same year.

69. **Hostilianus**, son, son-in-law or nephew of Decius [authorities differ.] Associated in the purple with Trebonianus Gallus, A. D. 251. Reported to have died the same year and also to have reigned two years.

70. **Gallus, Trebonianus, C. Vibius**. Joint ruler with Hostilianus. Killed with his son, by his soldiers, A. D. 253.

71. **Volusianus**, son of Gallus. Named Cæsar A. D. 251. Augustus 252. Killed with his father.

72. **Aemilianus, Aemilius**. Born A. D. 208. Proclaimed Emperor in Mæsia, 253. Killed by his soldiers 254.

73. **Valerianus, P. Licinius**. Born A. D. 190. Emperor 253. A great soldier, called upon to rule on account of his high merit. He was captured by the Persians 261, and died in captivity from cruel treatment, 263. After death his skin was stuffed and preserved as a trophy by his enemies.

74. **Mariniana**; wife, sister or daughter of Valerianus. Known only by her coins.

75. **Gallienus, P. Licinius Valerianus Egnatius**; son of

ANCIENT ROMAN COINS.

ANCIENT ROMAN COINS.

Valerianus by his first wife. Emperor with his father A. D. 253. Assassinated 268. A contemptible character. It was during this reign that the many generals declared themselves Emperors, and these are designated as *The Thirty Tyrants*.

76. **Salonia, Cornelia**, Augusta, wife of Gallienus, mother of Saloninus.

77. **Valerianus, Junior**, half brother of Gallienus, and a happy opposite in character. Assassinated A. D. 268.

78. **Saloninus, P. Licinius Cornelius**, son of Gallienus. Born A. D. 242. Caesar 253. Put to death 259.

79. **Postumus, M. Cassianus Latinus**. One of The Thirty Tyrants. Rebelled against Gallienus, and proclaimed himself Emperor in Gaul A. D. 258. He was a strict but just ruler while he reigned. Killed 267.

80. **Victorinus, M. Praxvovius**. One of the Thirty Tyrants, was associated with Postumus in the purple. A superior general and statesman, but a slave to his passions. Assassinated A. D. 267.

81. **Marius, M. Aurelius**. Emperor in Gaul, A. D. 267. The fourth of the Thirty Tyrants who ruled Gaul. His reign lasting for forty-eight hours, when he was assassinated. His coins must have been minted before he assumed power.

82. **Tetricus, C. Pesuvius**. The last of the Thirty Tyrants who governed in Gaul, where he was proclaimed Emperor, A. D. 267. He restored the provinces to Aurelian in 273, by betraying his army in battle to that ruler, and soon after retiring to private life he died at a very advanced age.

83. **Tetricus, C. Pesuvius Pivesus**. Proclaimed Caesar while a child; son and successor of C. Pesuvius Tetricus, one of the Thirty Tyrants, who ruled from A. D. 267, until conquered by Aurelian, about A. D. 274.

84. **Macrianus, Senior**. One of the Thirty Tyrants. A brave soldier, defeated and killed in battle by Aureolus, A. D. 262.

85. **Macrianus, Junior**, son of the preceding. Flourished during the latter years of his father, shared his power and met with the same fate.

86. **Claudius II, M. Aurelius Claudius Gothicus**. Born A. D. 214. Emperor A. D. 268. Died 270. A great warrior, a wise ruler. He endeavored to re-establish honest coinage and issued money of copper, plated or silvered over.

87. **Quintillus, M. Aurelius**. Emperor A. D. 270, reigned but a few weeks, when, deserted by his soldiers he killed himself. He bears a high character in history.

88. **Aurelianus, Valerius, or L. Domitius**. Born A. D. 270. Emperor A. D. 270. Treacherously killed A. D. 275. A victorious soldier and able ruler, the history of his reign is most brilliant.

89. **Severina, Ulpia**, wife of Aurelianus, seems to have been worthy her great spouse. Medals and coins were struck in her honor, and prove that she survived her husband.

90. **Vabalathus, Athenodorus**, son of Zenobia, Queen of Palmyra. He was made Emperor in Syria A. D. 266, and captured by Aurelian 273. Certain of his coins bear the face of Aurelian on the obverse.

ANCIENT ROMAN COINS.

ANCIENT ROMAN COINS.

91. **Tacitus, M. Claudius.** Emperor from Sept. A. D. 275 to April 276. A wise ruler, not ambitious of military glory, but a promoter of all peaceful arts.

92. **Florianus, M. Annius.** Born A. D. 232. Half-brother of Tacitus, at whose death he assumed supreme power, ruling from April to June or July 267, when he was killed either by the revolting soldiers or his own hand.

93. **Probus, M. Aurelius.** Born A. D. 232. Son of Maximus. Emperor from 276 to 282, when murdered. His whole reign was a series of most brilliant achievements in peace and war.

94. **Carus, M. Aurelius.** Born A. D. 230. Successor to Probus. Reported killed by lightning 283, but probably murdered. More successful in war than peace. Some coins represent him with Carinus his son.

95. **Carinus M. Aurelius,** eldest son of Carus. Born A. D. 249. Emperor 283. Killed 284. Successful in war, a cruel, profligate and wasteful ruler, who married and repudiated nine wives.

96. **Numerianus, M. Aurelius,** brother of Carinus. Born A. D. 254. Cæsar 282. Augustus 283. Died 284. His father-in-law, Arrius Aper, was killed on suspicion of murdering him. A wise and much beloved ruler.

97. **Diocletianus, Valerius.** Born A. D. 245. Emperor 284. Adopted Galerius 292; abdicated 305. Died 313. Of most obscure parentage, he rose by merit, and well deserved all the honors he gained. But he terribly persecuted the Christians.

98. **Maximianus II. Hercules.** Born A. D. 250. The son of a shepherd. Associated in the Empire with Diocletian in 286; abdicated 305; retook the Empire, 306; abdicated again 308; proclaimed himself Emperor once more, 309; strangled himself, 310. A distinguished general and bad man, a relentless persecutor of the Christians.

99. **Carausius, M. Aurelius Valerius.** Emperor in England A. D. 287. Assassinated 293. A remarkable man, who rose from most lowly beginnings. He forced his powerful enemies to become his allies, and in all acts showed the greatest vigor and prudence.

100. **Allectus.** Emperor in England A. D. 293, by his murder of Carausius. Killed 296. A vile character.

101. **Julianus, Marcus Aurelianus.** Governor of Venetia in Italy. Usurped the Imperial power A. D. 284, was conquered and killed 285.

102. **Constantius I.** surnamed **Chlorus. Flavius Valerius.** Born A. D. 250. Emperor 305 with Galerius, the former being placed over Gaul, Britain and Spain. He was a wise and just ruler and treated Pagans and Christians with impartiality and toleration. Died 306.

103. **Helena, Flavia Julia.** Born about A. D. 248. Wife of Constantius I, and mother of Constantine the Great. She was divorced through State Policy. A noble lady and true Christian, she died in 328, and honors were showered upon her memory.

104. **Theodora, Flavia Maximiana,** second wife of Constantine Chlorus, for whom he repudiated Helena.

105. **Maximianus II, Galerius Valerius.** Adopted and named Cæsar by Diocletian, A. D. 292. Augustus and Emperor 305. Died 311.

ANCIENT ROMAN COINS

ANCIENT ROMAN COINS.

106. **Galeria, Valeria**, daughter of Diocelitian, second wife of Maximianus II. She and her mother were beheaded by order of Licinius, A. D. 315.

107. **Severus, Flavius Valerius**. Named Cæsar by Maximianus Hercules, A. D. 305; Augustus and Emperor 306. Compelled to put an end to himself A. D. 307.

108. **Maximinus, Galerius Valerius**. Original name Daza, nephew of Galerius. Named Cæsar A. D. 305; assumed the title of Emperor 308. Died of despair or poison 313. A violent, undeserving and ungrateful man.

109. **Maxentius, M. Aurelius**, son-in-law of Galerius. Emperor A. D. 306. Drowned in the Tiber 312. A monster of rapacity, cruelty and all other vices.

110. **Urbica, Magnia**. Only known by her coins. By some supposed to be the wife of Maxentius, by others, assigned to Carus, and by others to Carinus. The coin is pronounced by certain authorities to be a forgery.

111. **Romulus**, son of Maxentius. Born about A. D. 306; named Cæsar 337; Augustus soon after. Died while a boy.

112. **Nigrinianus**. A Roman Cæsar or Augustus. Known only by his coins. It has been conjectured by some that he was the son of Alexander, a usurper of Africa A. D. 311, by others that he was the son of Carus.

113. **Licinius; Publius Flavius Galerius Valerius Licinianus**. Born A. D. 263, of peasant parents. Gained friends and rank in the army; married the daughter of Constantius Chlorus. Named Cæsar and Augustus and Emperor with Galerius Maximianus 307. Prisoner of his brother-in-law Constantine, and strangled 323. A cold blooded tyrant.

114. **Constantinus I, Flavius Valerius Aurelius**, surnamed **Magnus**, or "The Great." Born A. D. 274. Son of Constantius Chlorus and Helena, son-in-law of Maximianus Hercules. Proclaimed Cæsar and Augustus in Britain 306, and Augustus by Maximianus 308. In 311 he embraced the Christian religion. Became sole Emperor 323. Quitted Rome in 330, for Byzantium, which he named Constantinople. Died 337.

115. **Fausta, Flavia Maximiana**. Married to Constantine I. A. D. 307. Caused the death of her step-son, and some historians say, was smothered to death in a warm bath by her husband's order, 326.

116.

117. **Licinius, Junior, Flavius Valerius Licinianus**, son of Licinius I. Born A. D. 315. Made Cæsar 317. Stripped of all honors and put to death 326.

118. **Crispus, Flavius Julius**, son of Constantine I. Born about A. D. 300. Named Cæsar 317. Gained glory in battle. Put to death by his father, at the instigation of his step-mother 326.

119. **Delmatius, Flavius Julius**, nephew of Constantine I. Named Cæsar A. D. 335. Killed 337.

120. **Constantinus II, Flavius Claudius**, surnamed **The Younger**, son of Constantine I. Born A. D. 312. Named Cæsar 316. Ruler of Gaul, Spain and England 335. Emperor and Augustus 337. Defeated and killed in battle 340.
